Menu

When clicking the **Menu** button in the upper-right corner, you will see the menu list like this:

Tutorials

- Import Music Files
- Delete Music Files
- Choose Output Profile
- Customize Output Directory
- Convert Audio Files
- Check Conversion History
- AA/AAX Converter
- AI Audio Splitter
- Audio Editor
- Edit ID3 Tags
- Format Converter

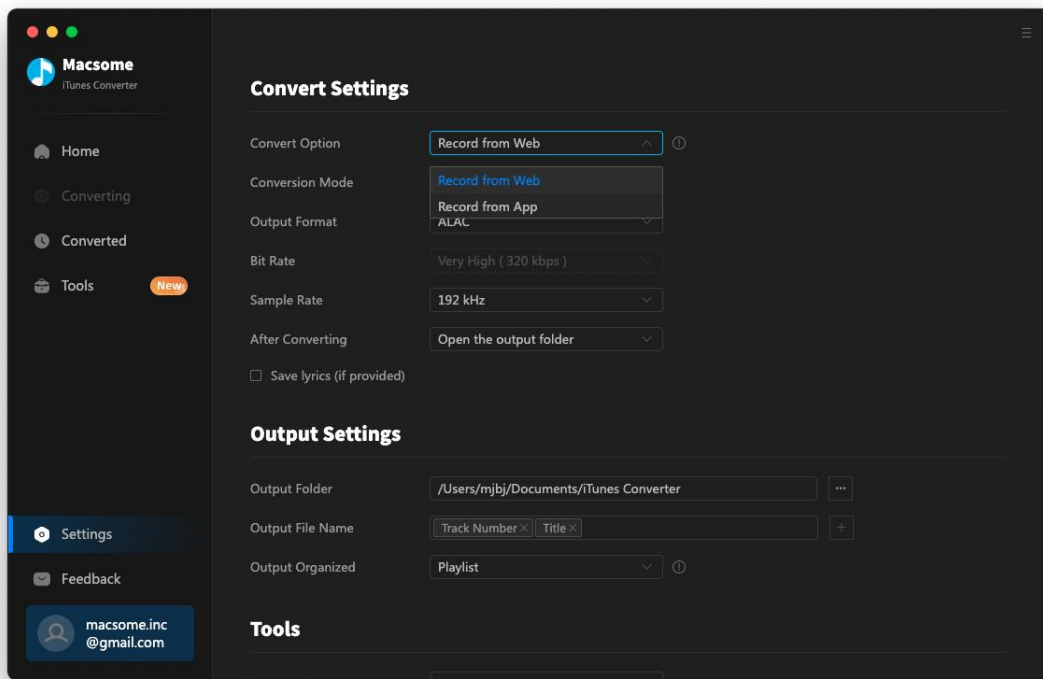

Import Music Files

Macsome iTunes Music Converter offers two download modes: from the Apple Music App or from the Apple Music Web Player.

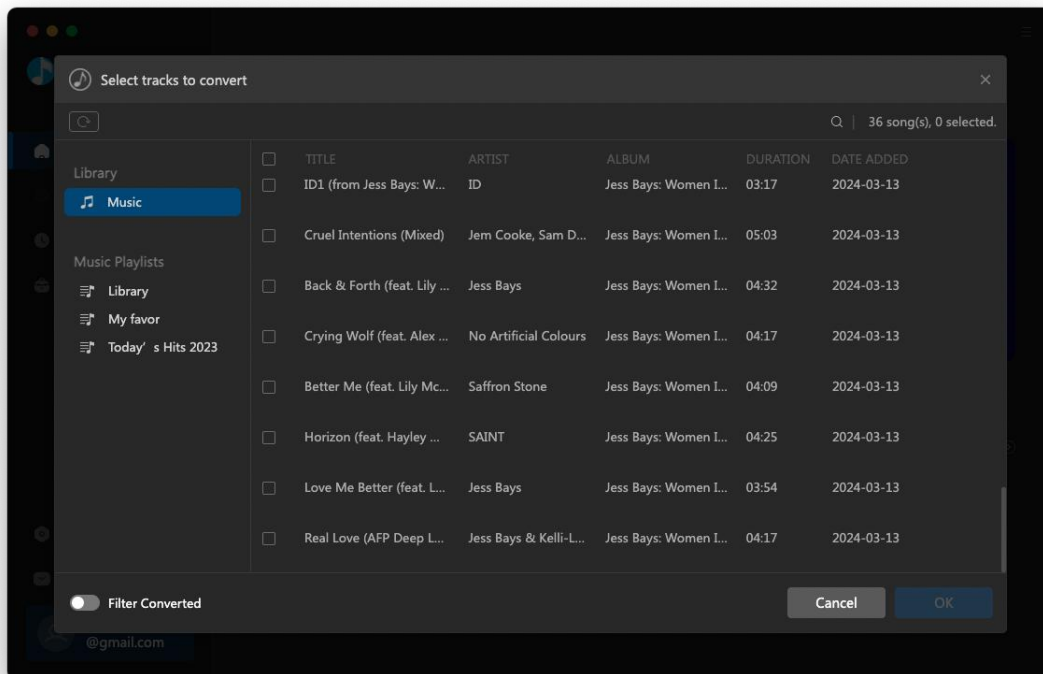

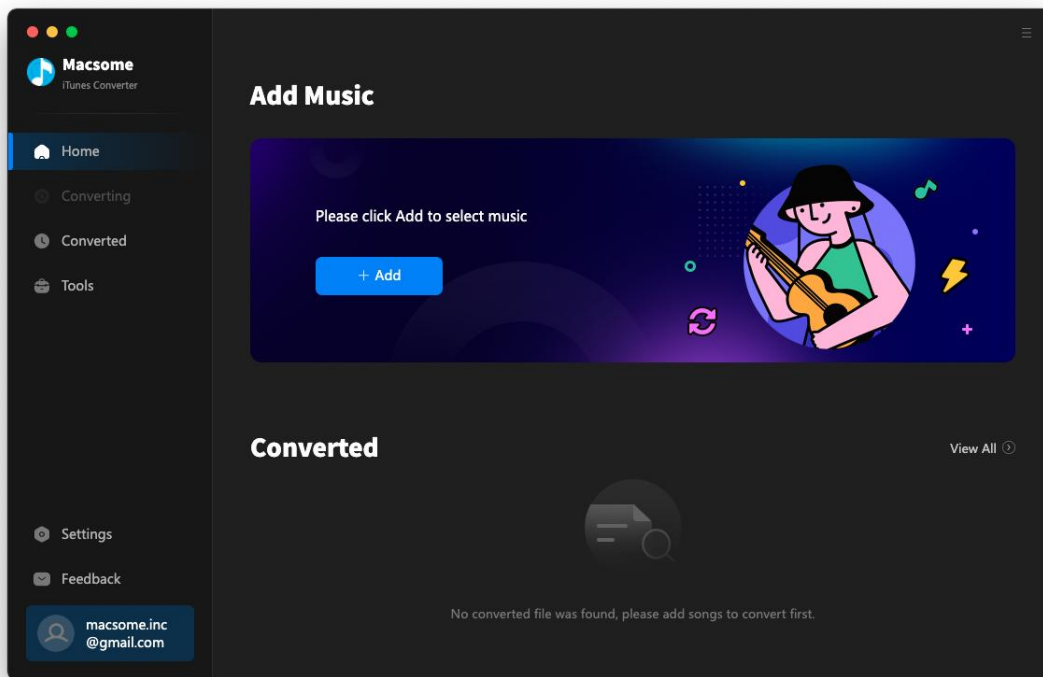

Differences between 2 Download Modes:

Record music from Apple Music App: 1X speed; keep original quality; convert Apple Music, iTunes purchased tracks, and more.

Record music from Apple Music Web Player: up to 10X speed; convert Apple Music only.

Record from App: Click the "+ Add" button, then you will see a pop-up window which will show you all the iTunes folders. You can add Apple Music files, audiobooks, and M4P audio as you want.

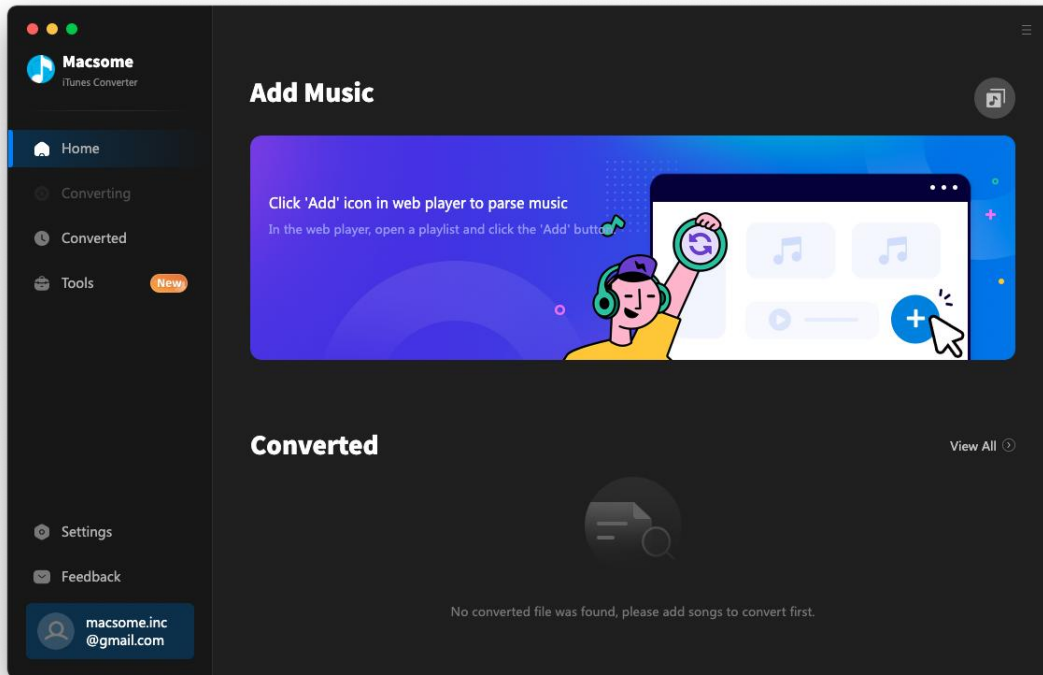

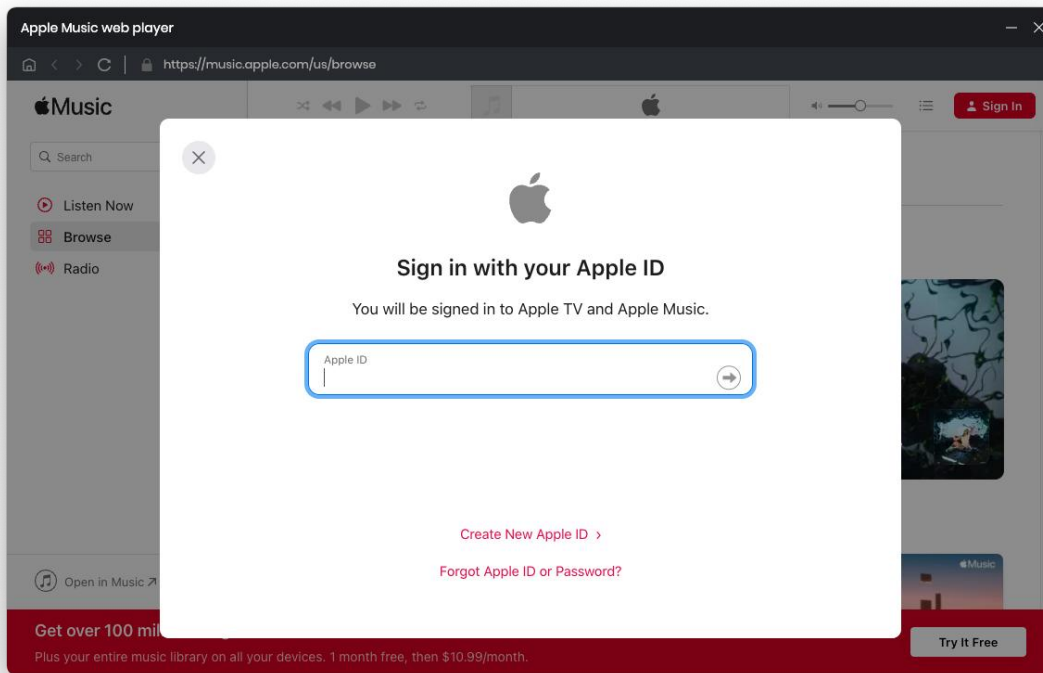

Record from Web: Use your Apple Music account to log in to the web player. Open a playlist, and press the "Click to add" button, then you will see a pop-up window which will show you all the tracks of this playlist.

Macsome iTunes Converter for Mac User Manual

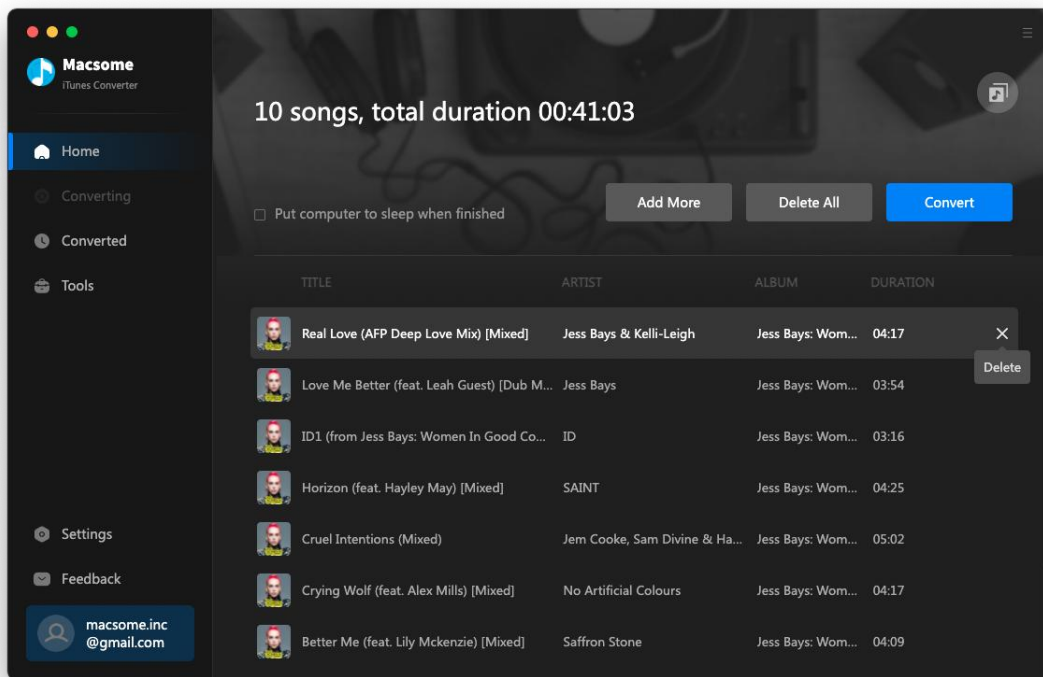

Note: If you choose the **"Record from Web"**, you are able to download Apple Music songs at up to **10X** faster speed. You'll need to log into your Apple Music account before conversion, but don't worry, it will not take any other information from your account other than the songs.

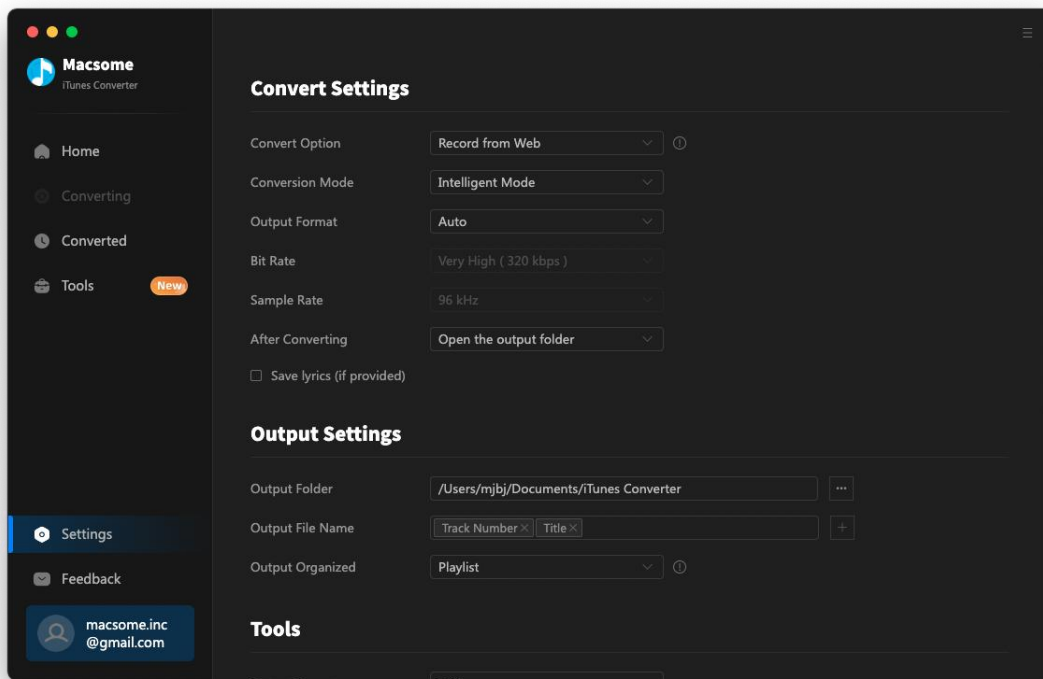

Delete Music Files

Select the files you want to delete at first. Then Click the  button or **Delete All** button to delete.

Choose Output Format

Click the **Settings** button at the lower left corner to set the **Output Format** (MP3, AAC, WAV, FLAC, AIFF, and ALAC), **Conversion Mode** (Intelligent Mode, iTunes Record, Web Download, YouTube Download), and **Output Path** for your needs.

Customize Output Path

Click **Settings** button at the lower left corner, then you can customize the output directory in the pop-up window.

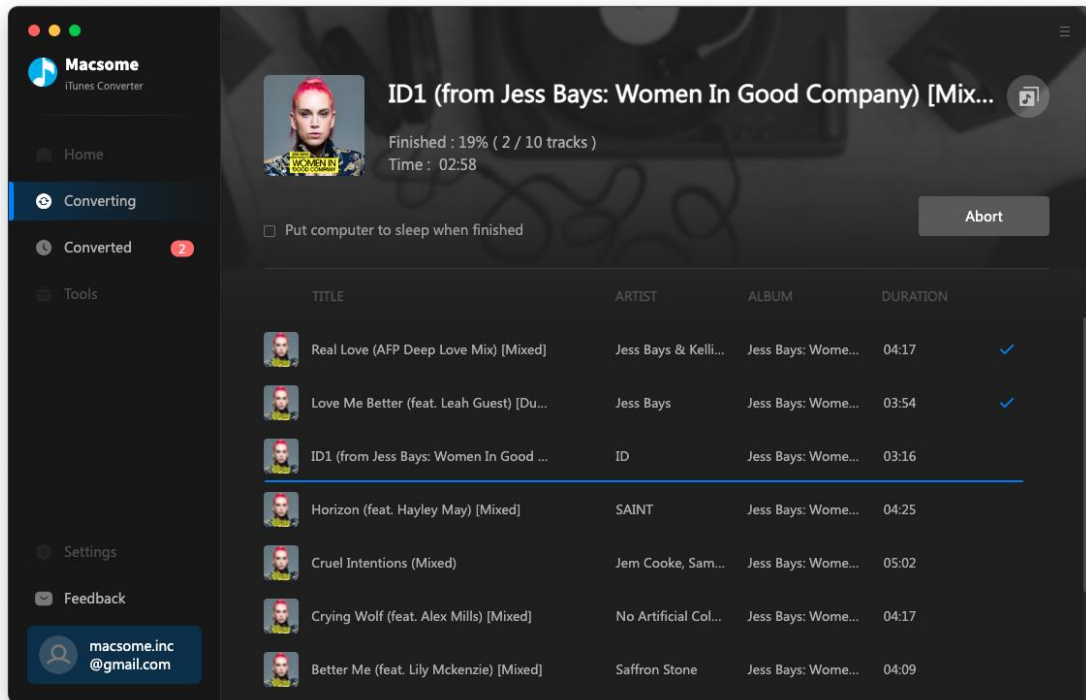

Tips:

1. If you don't change the output path, the converted files will be saved in Macsome default folder:
Users/User Name/Documents/iTunes Converter
2. You can click the ... button to show the output path.

Convert Apple Music

After finish customization, just click the **Convert** button to start the converting.

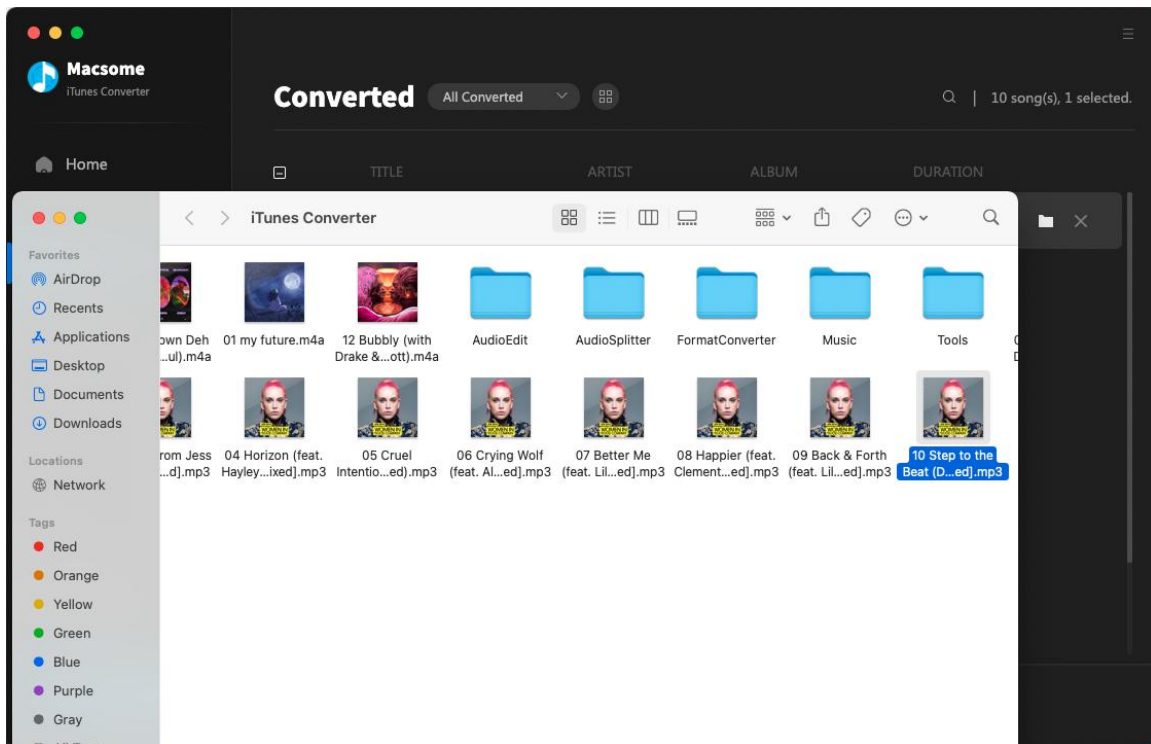

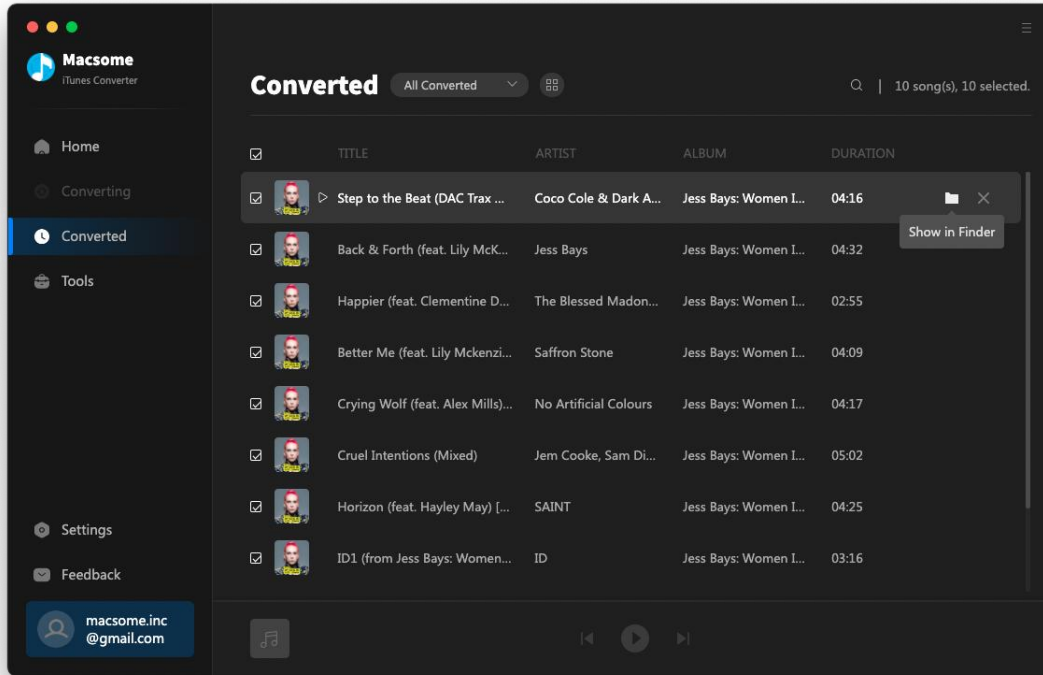

Note: Before converting, make sure your computer is well authorized with the same Apple ID that you used when downloading the audio and the original file can be played on iTunes.

Warning: Before the status show converting progress, please don't do anything with iTunes during converting, otherwise the conversion may fail by occurring an error.

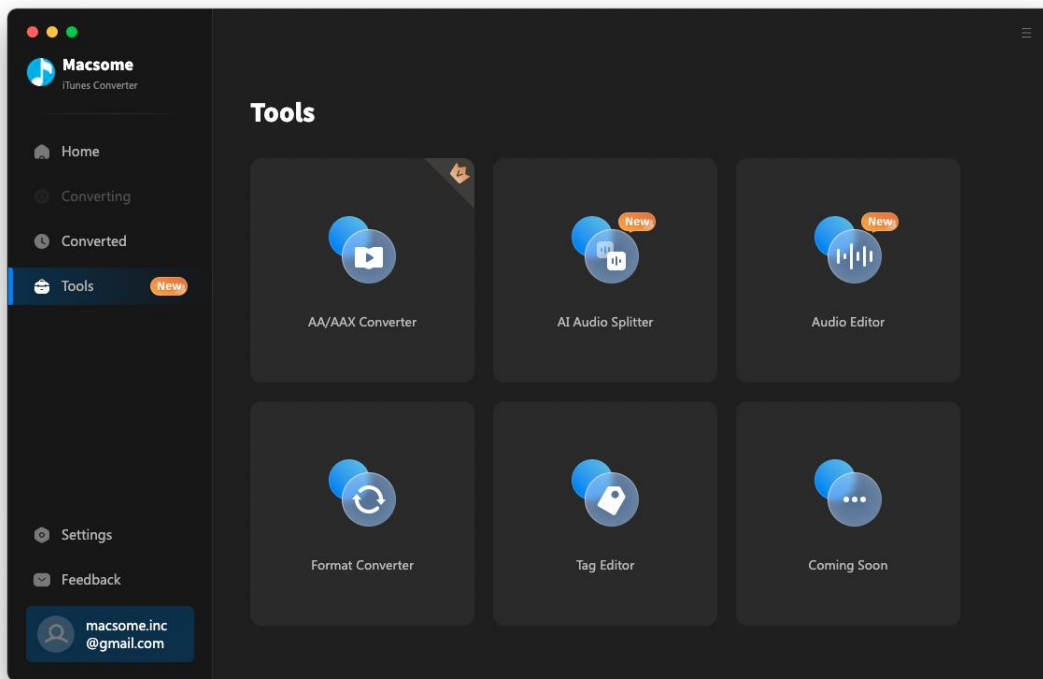

Check Conversion History

When the conversion is completed, the history records will be saved automatically. Click the **Converted** button on the left side to show up the records.

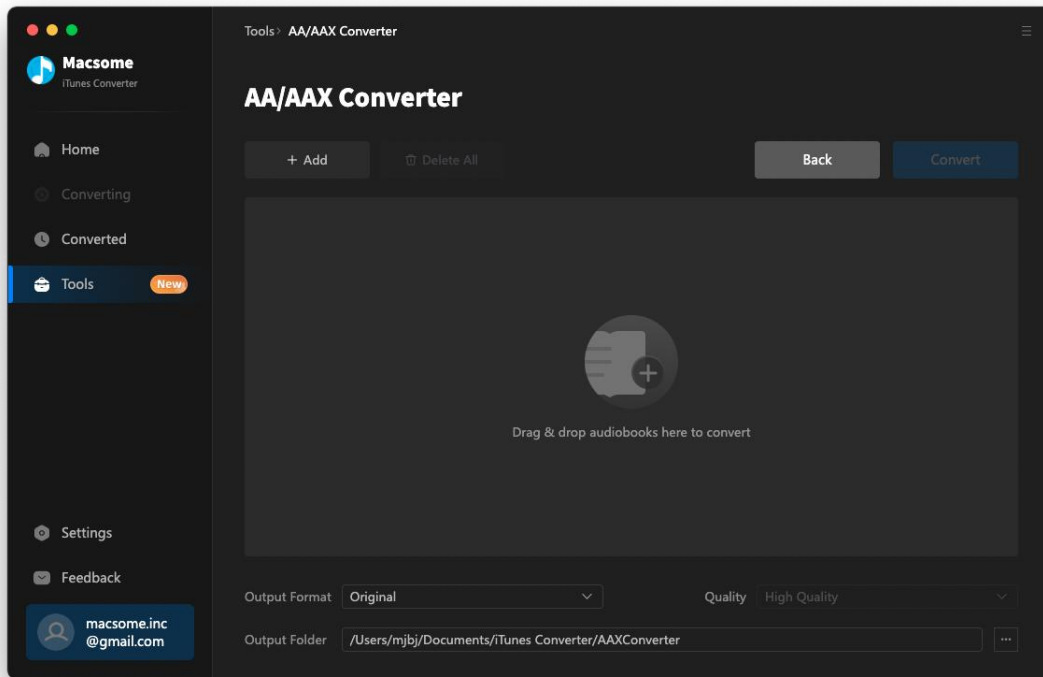

Tools - How to Use Built-in Tools of Macsome iTunes Converter

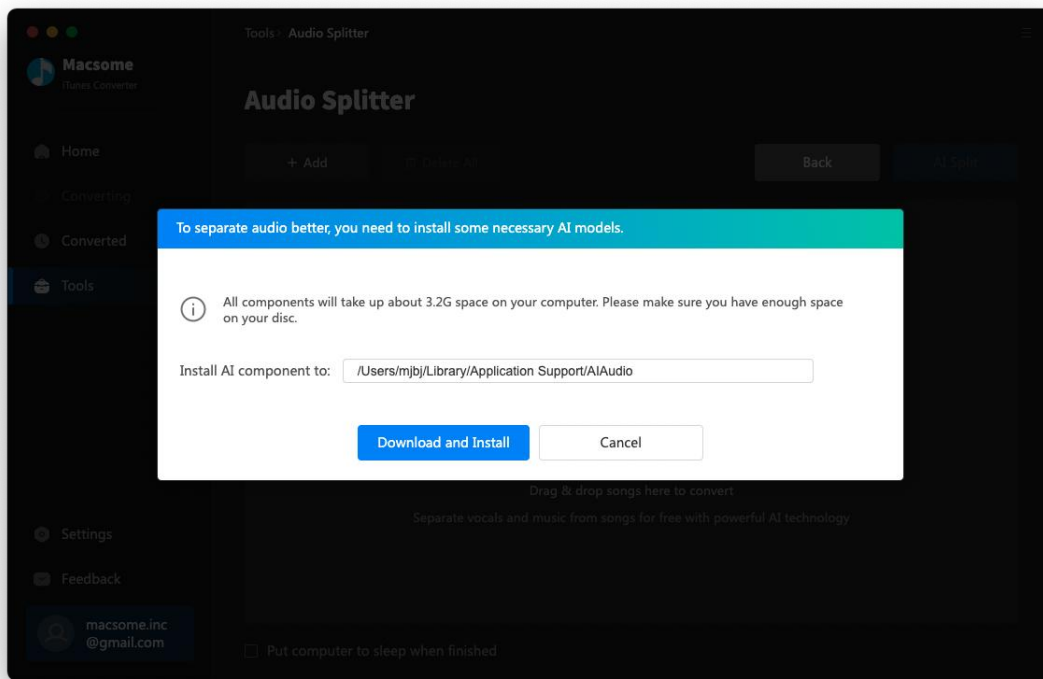

AA/AAX Converter

AA/AAX Converter lets you convert local Audible aa or aax audio books to MP3, M4A, and M4B with the original quality.

AI Audio Splitter

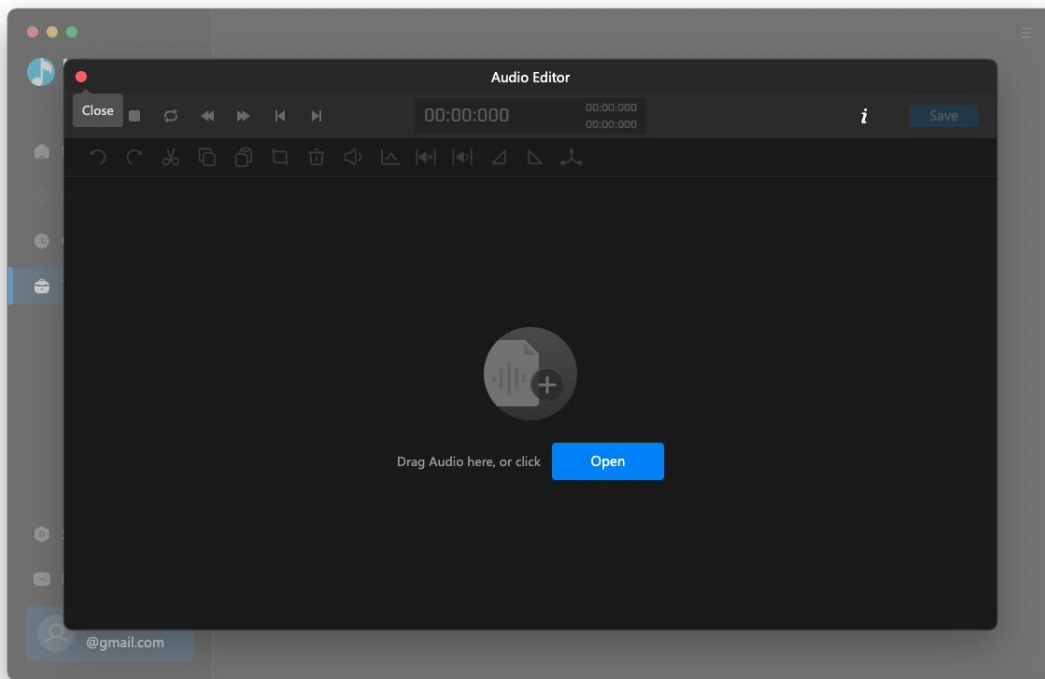

The AI Audio Splitter can separate vocals and music from songs for free. When you choose to use this free AI Audio Splitter, the program will check you whether install some necessary AI models. If not, it will take a few minute to install the component. Please make sure you have enough space on your disc. When everything is ready, you can drag and drop the songs to the Splitter to convert.

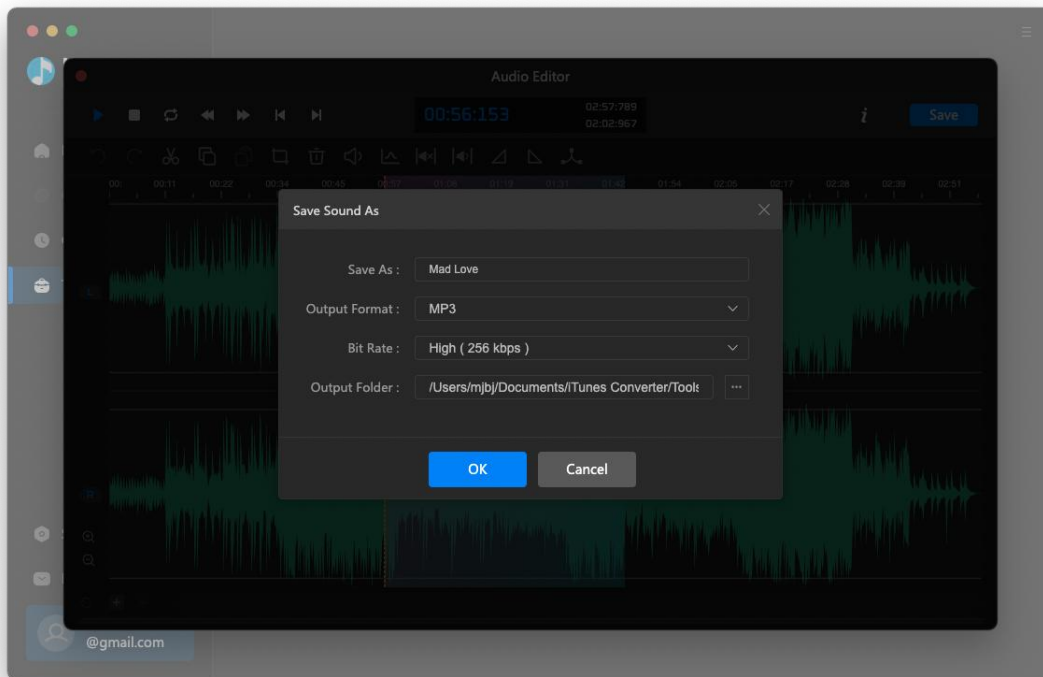

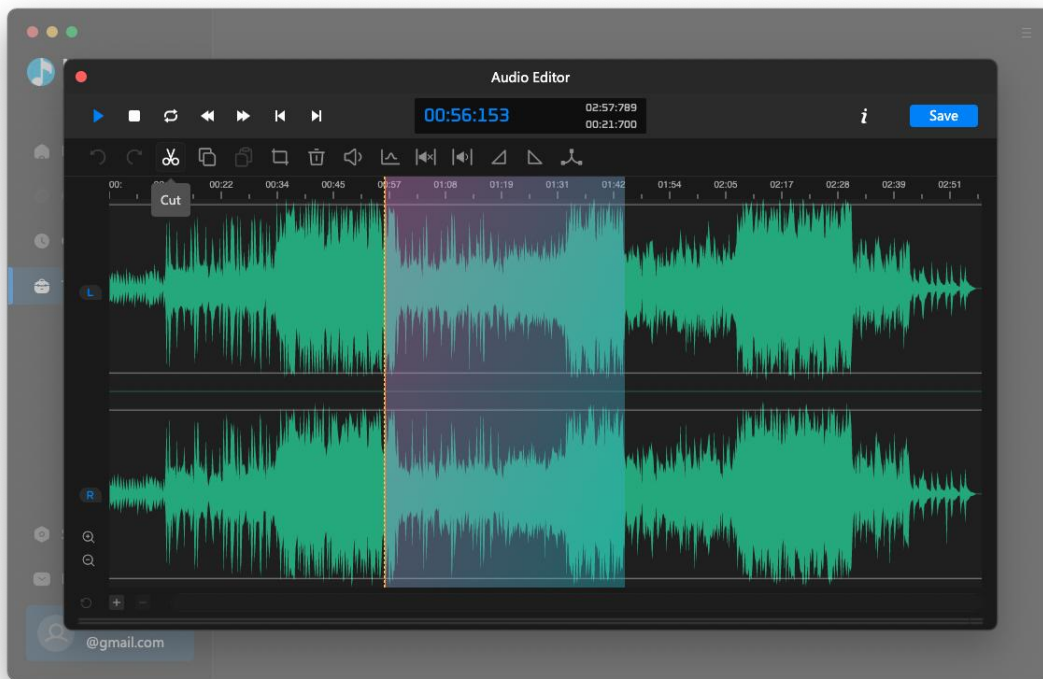

Audio Editor

The Audio Editor is a simple and powerful audio editing tool that lets you to edit audio files by cutting, pasting, and trimming audio clips. Typically, it also includes features for fading in and fading out audio clips, adjusting the volume.

You can import audio files by dragging them directly from the local target folder or by clicking the **"Open"** button and selecting the desired file. Now you can edit the local audio files as you like.

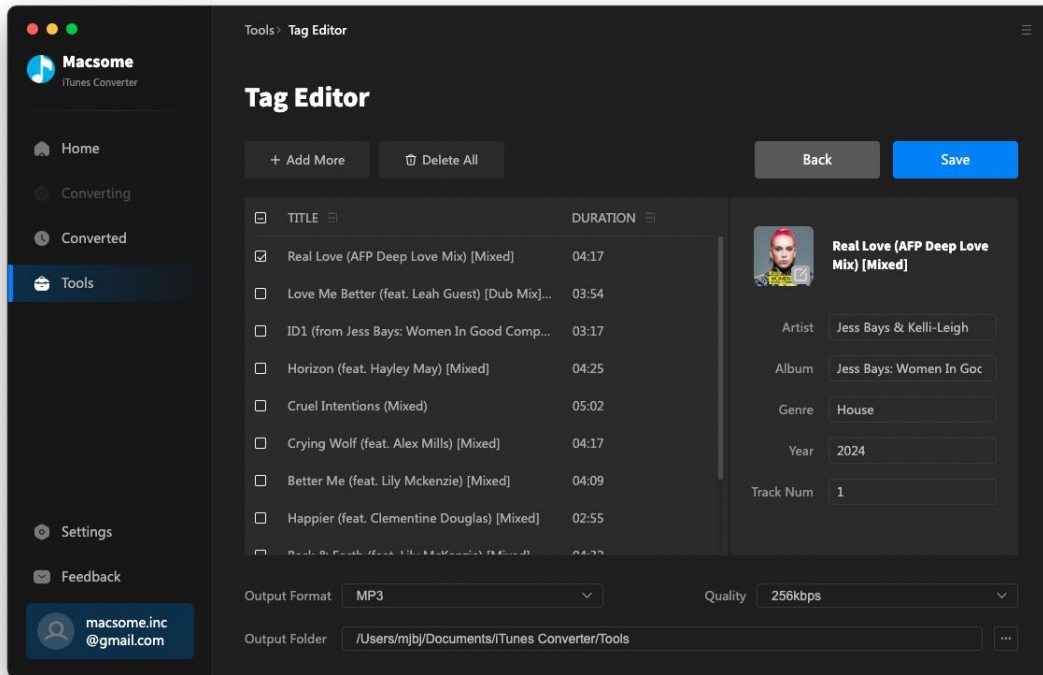

Edit ID3 Tags

The program retains the original quality of Apple Music and keeps all ID3 tags after conversion. And you can also edit all the important and useful Meta information by clicking "Tools" .

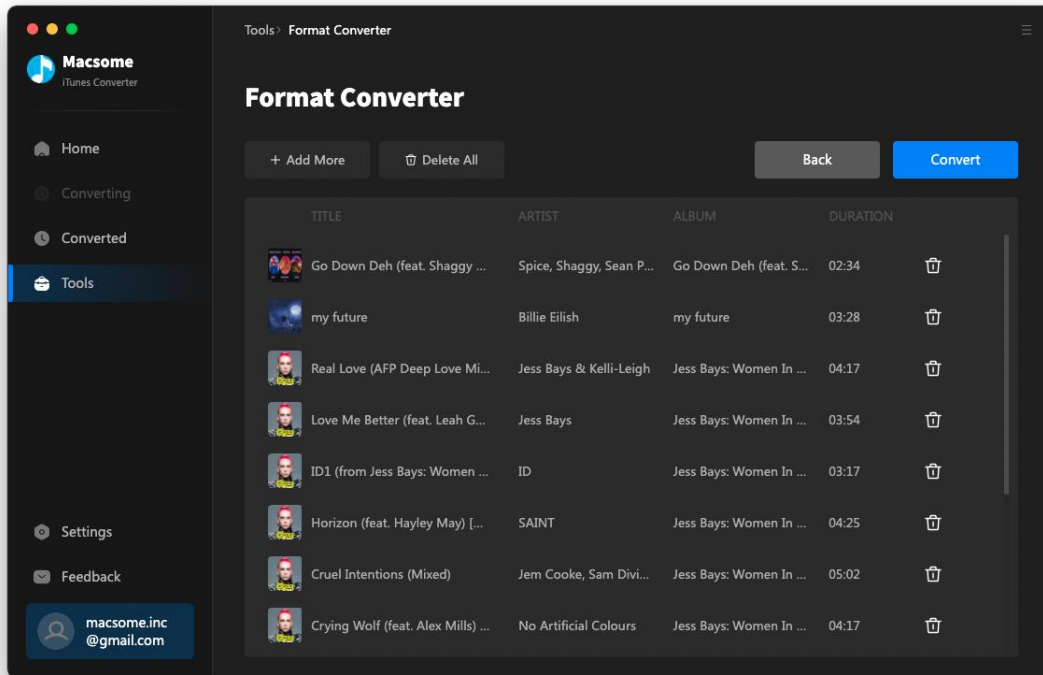

Select "Edit Tag". Click **Add** button to import the songs you want to edit.

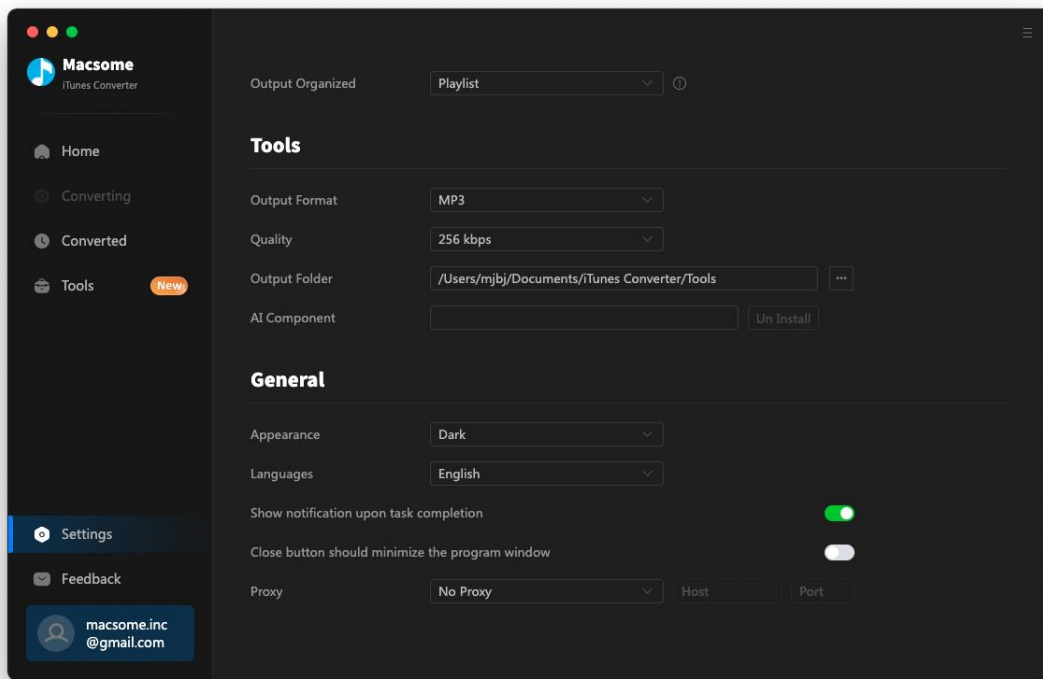

Format Converter

Apart from converting Apple Music, Macsome iTunes Converter also supports to **convert the common music to MP3/ALAC/AAC/WAV/OGG/AIFF format**. Simply open Macsome, click "Tools" >> "Format Converter", and then add the music from your computer to convert.

If you want to change the output format you want, please go to the **Settings** tab, scroll down and find the **Tools** section. You can then select the output format, output quality, and output path.
