Introduction

Thanks for using **Macsome Music One**!

[Macsome Music One](#) is an all-in-one streaming converter that lets you download music losslessly from popular music streaming services, such as Spotify, Apple Music, Amazon Music, Tidal, YouTube Music, Deezer, Pandora Music, Audible, and Line Music.

You can also record audio straight from popular online video platforms or other websites, including YouTube, SoundCloud, Dailymotion, Vimeo, Veoh, etc. Besides, it can also let you play and download popular podcasts in batches.

Macsome Music One ensures that streaming music downloads and conversion tasks are performed 10x faster. When downloading content from the Audible website, you can batch download Audible audiobooks and podcasts at up to 300x faster speed.

Macsome Music One can also preserve the high quality of downloaded audio just like the original, such as Spotify 320kbps, Apple Music (Hi-Res) Lossless, Amazon Music (Ultra) HD, Tidal Master, and more. Macsome lets you change the sample rate from 44.1 kHz to 192 kHz and adjust the bit rate from 128 kbps to 320 kbps to match your source music.

Key Features

- Download music from various streaming platforms, such as Spotify, Apple Music, Amazon Music, Tidal, Deezer, YouTube Music, Pandora, Line Music, etc.

Download Podcasts in batches

The screenshot shows the Macsome Music One application window. On the left is a sidebar with navigation options: Music, Podcasts, Radio, Converting (selected), Converted (3 items), Tools, AI Optimize, Settings, and Feedback. At the bottom of the sidebar is a contact button for macsome.inc@gmail.com. The main area displays the conversion progress for the podcast 'JRE MMA Show #164 with Israel Adesanya'. It shows 'Finished : 0% (3 / 2384 tracks)' and 'Time : 106:47:18'. There is an 'Abort' button and a checkbox for 'Put computer to sleep when finished'. Below this is a table of tracks being converted.

	TITLE	ARTIST	ALBUM	DURATION	
	#2212 - Jelly Roll	Joe Rogan		02:23:21	✓
	#2211 - Michael Shellenberger	Joe Rogan		03:22:29	✓
	#2210 - Calley Means & Casey Means, ...	Joe Rogan		02:27:42	✓
	JRE MMA Show #164 with Israel Adesa...	Joe Rogan		02:42:13	
	#2209 - Paul Rosolie	Joe Rogan		03:36:33	
	#2208 - Brigham Buhler	Joe Rogan		03:13:54	
	#2207 - Shawn Ryan	Joe Rogan		02:47:11	

Record radios

The screenshot shows the Macsome Music One application interface. On the left is a sidebar with navigation options: Music, Podcasts, Radio, Recording (selected), and Converted (with a red badge showing '2'). Below these are Tools, AI Optimize, Settings, and Feedback. At the bottom of the sidebar is a contact button for 'macsome.inc@gmail.com'. The main window displays the 'Recording' section. At the top, there's a progress bar for a recording of 'KBUE Que Buena 105.5 _ 94.3 FM (U...' with a timer showing '(00:00) MI 45'. Below the progress bar are controls: a 'Mute' checkbox, a 'Stop recording after' dropdown set to '60' minutes, and two buttons: 'Pause' and 'Stop Recording'. Below the controls is a table listing the recorded tracks.

TITLE	ARTIST	ALBUM	DURATION
 KBUE Que Buena 105.5 _ 94.3 FM (U...			00:41
 KBUE Que Buena 105.5 _ 94.3 FM (U...			00:41

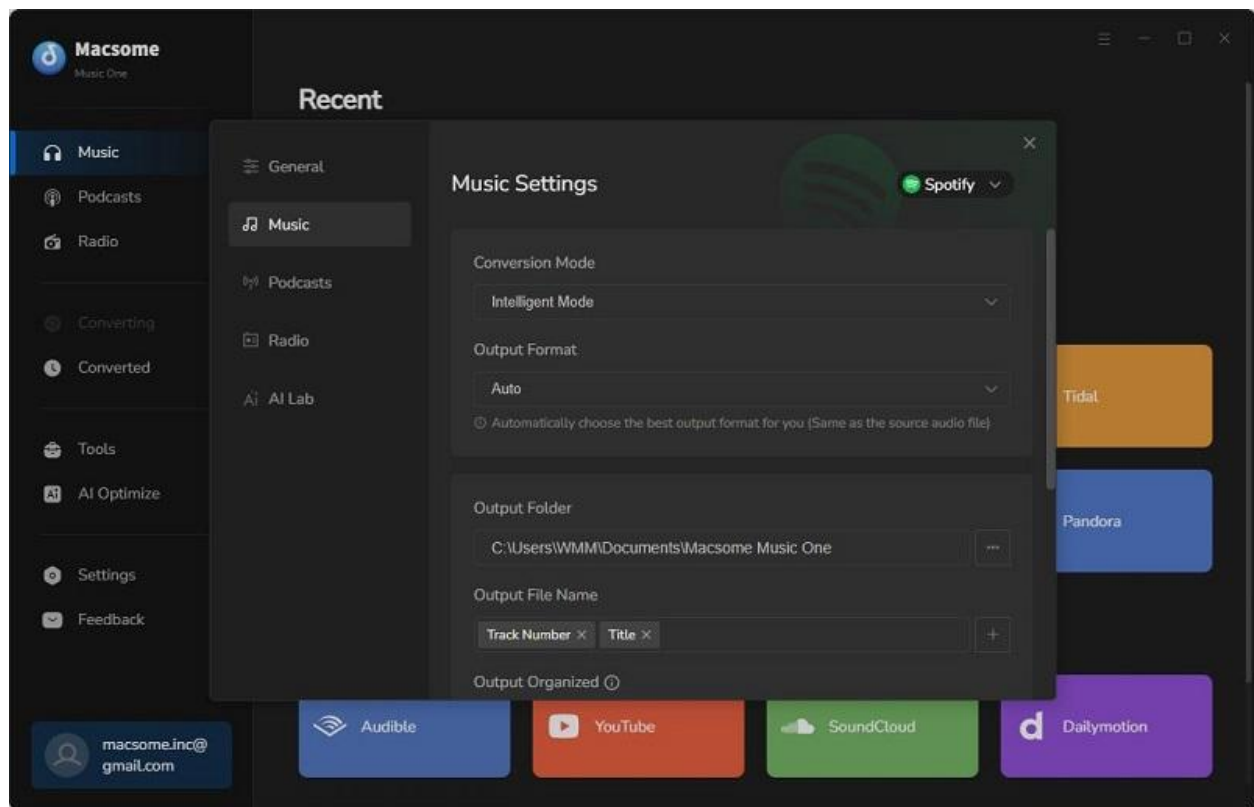

Tutorials

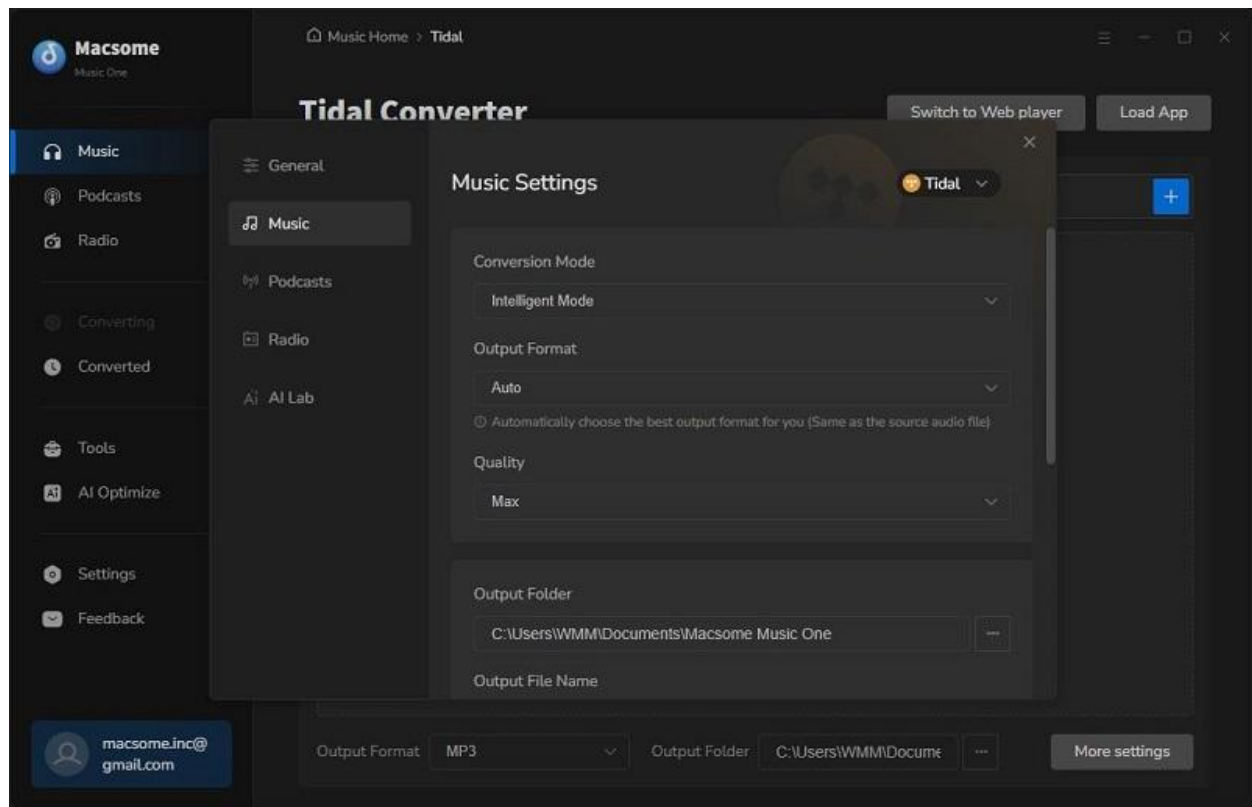

- Customize Output Settings
- Import Music Files
- Convert Music Files
- Check Conversion History

Customize Output Settings

In the **Music** section, select one platform you'd like to download music from, you can choose the Output Format (AUTO/MP3/AAC/FLAC/WAV/AIFF/ALAC), the Bit Rate (320kbps, 256kbps, 192kbps, 128kbps). Click on the **Settings** on the left or click the "**More settings**", you can set the output folder, output file name, or output organized way as you need.

If you want to get the best output quality, we suggest you choose **Auto** as the output format.

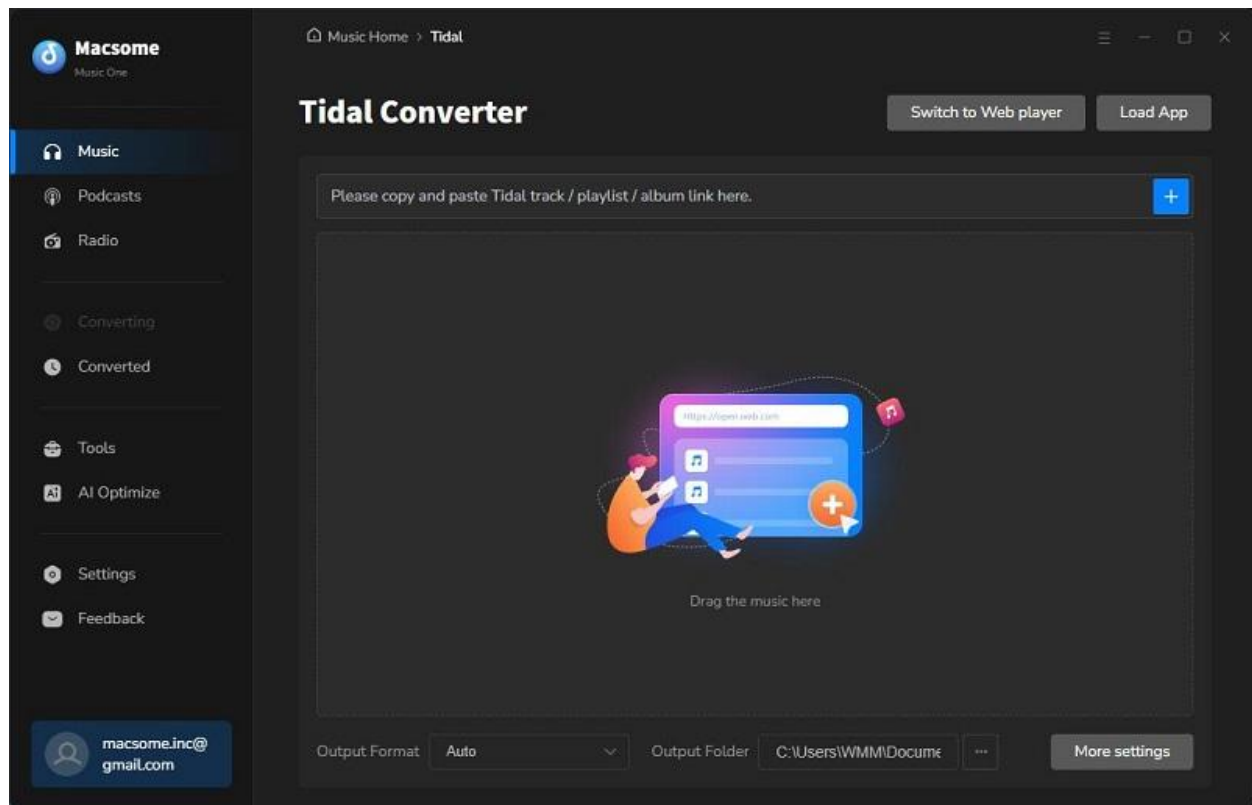

Import Music Files

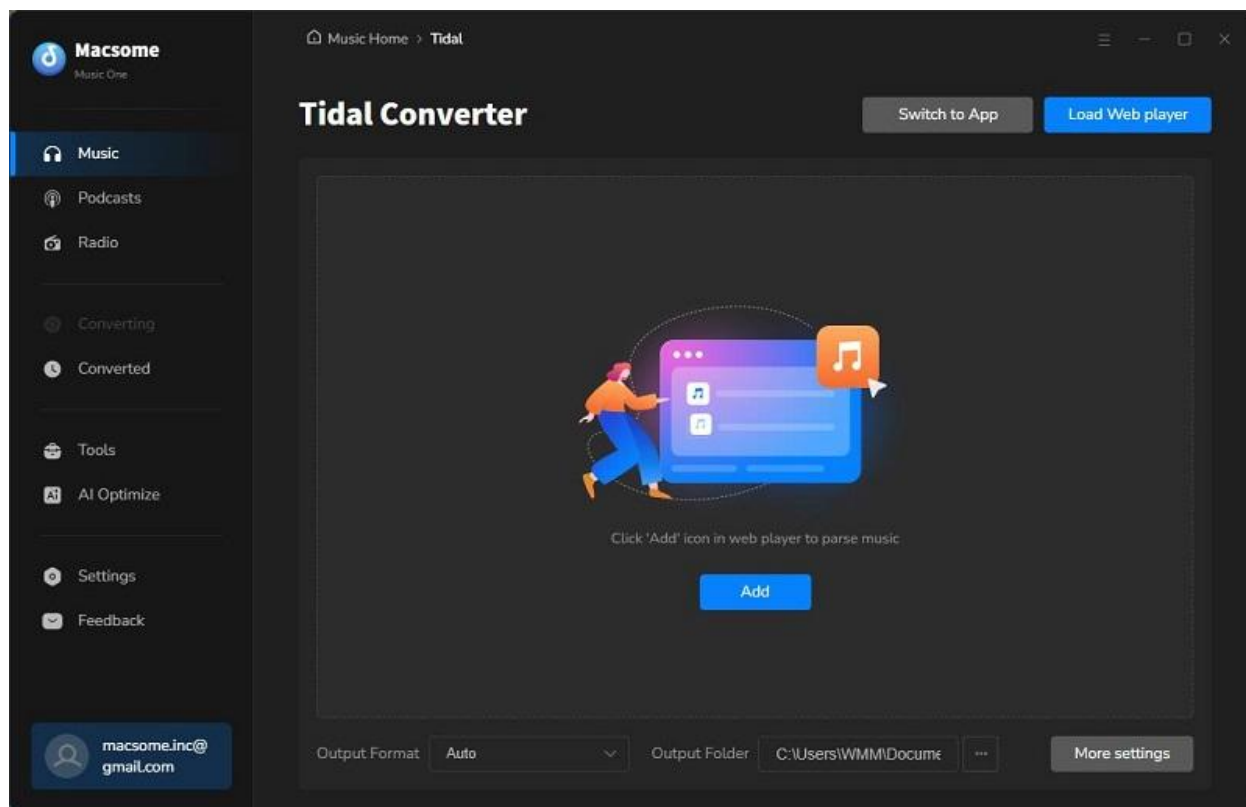

Add Music from App

On the Add Music tab, there are two methods to import music from the Tidal app to Macsome. You can directly drag and drop the playlist into the dotted-bordered rectangle, or copy and paste the Tidal song or playlist link to the blue box.

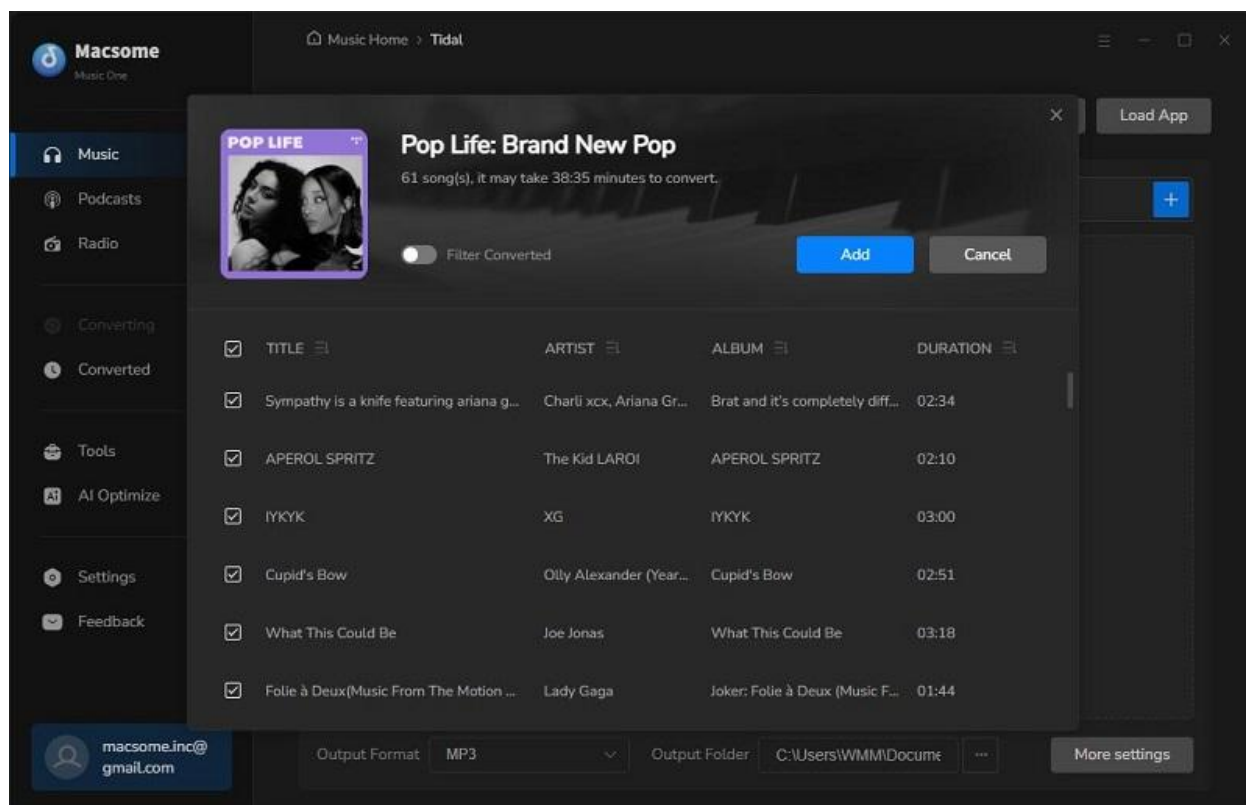

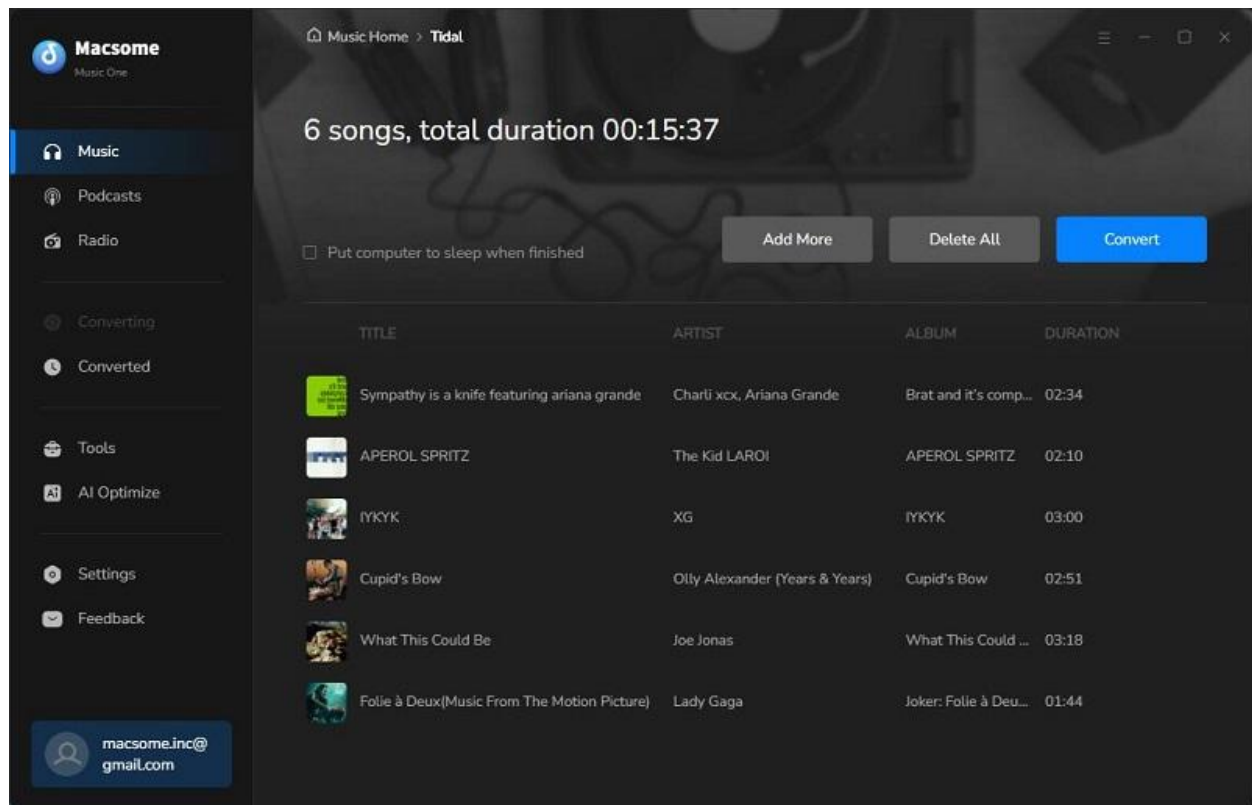

Add Music from Web Player

Go to the Tidal web player, search for a playlist you want to download, and then click the "Click to add" button to parse this playlist.

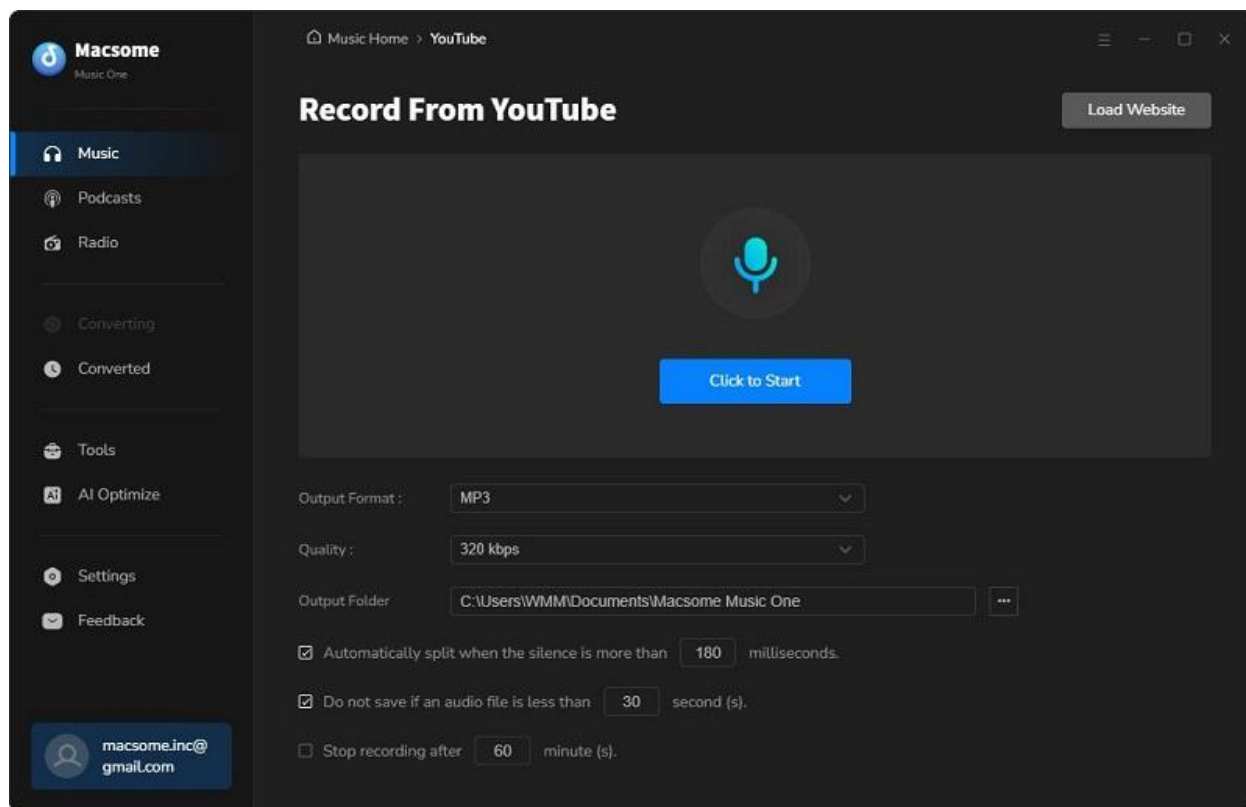

Then, click the **"Add"** button, all the songs will be listed on the main window. You can click the **"Add More"** button to continue choosing songs from other playlists or albums.

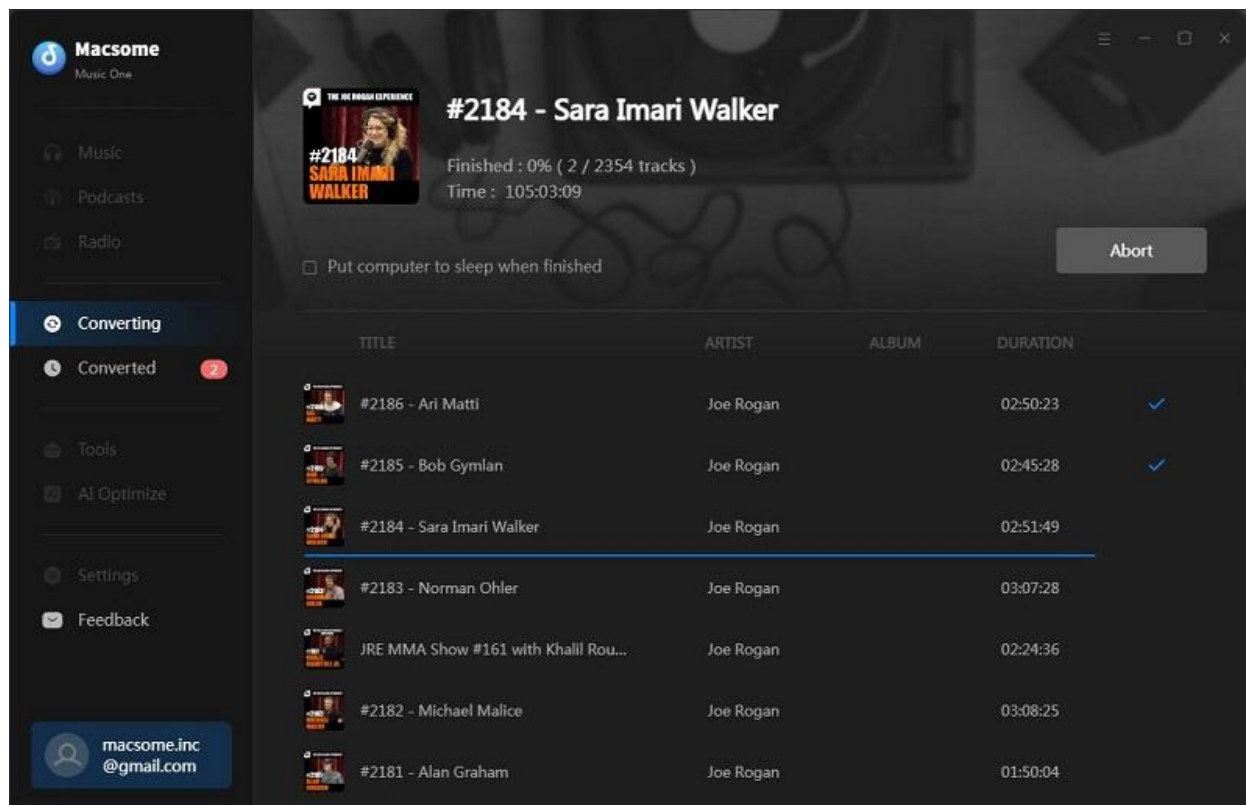

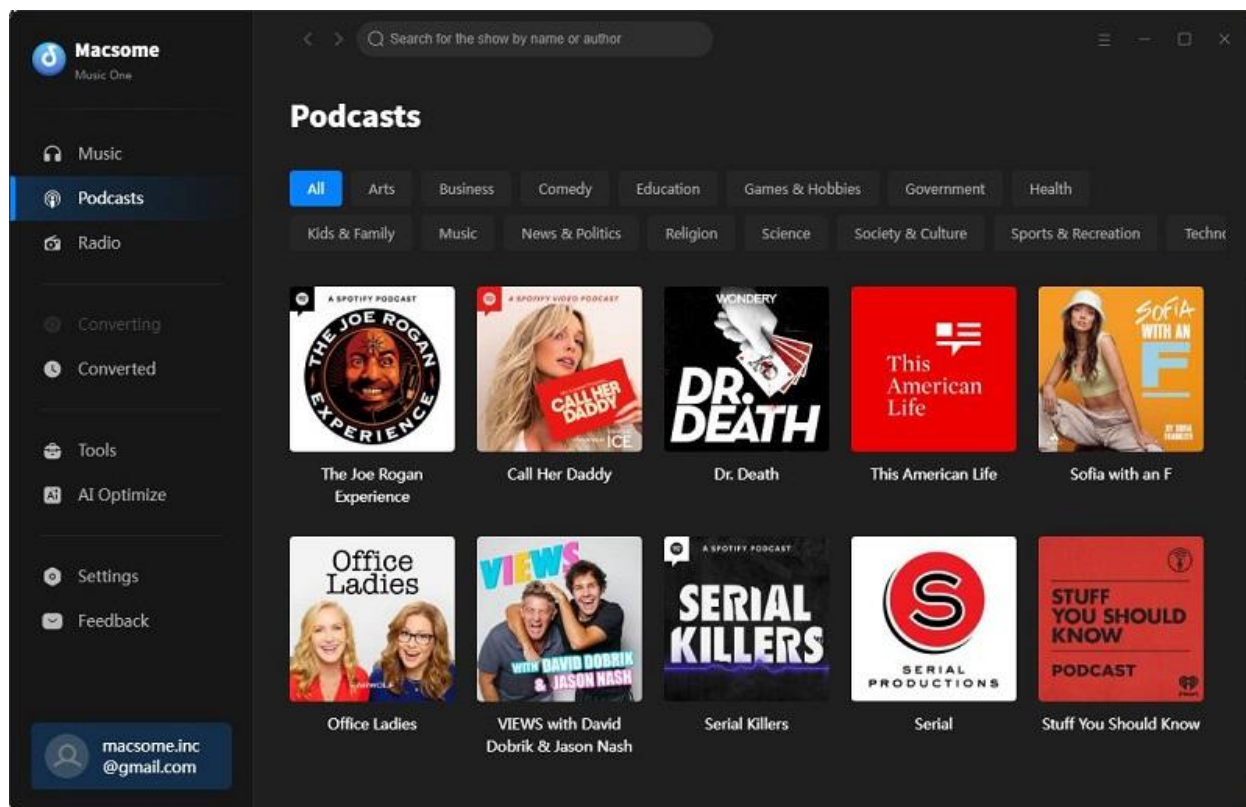

Add Music from Websites

Select a website you want to record from, like YouTube. Browser the content you want to record, then click the blue "Click to Start" button on the main interface to start recording. After recording, click "Stop." Then, the recorded songs will be automatically saved to the output path you set.

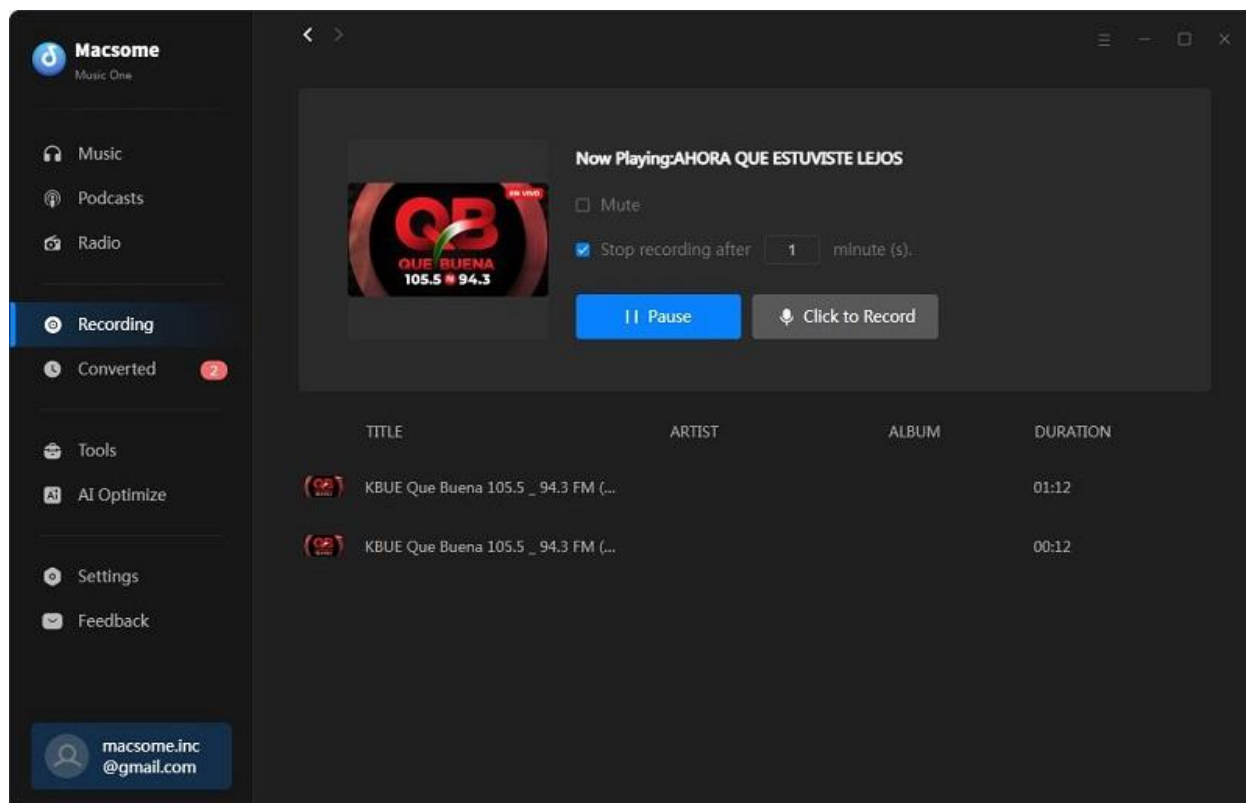

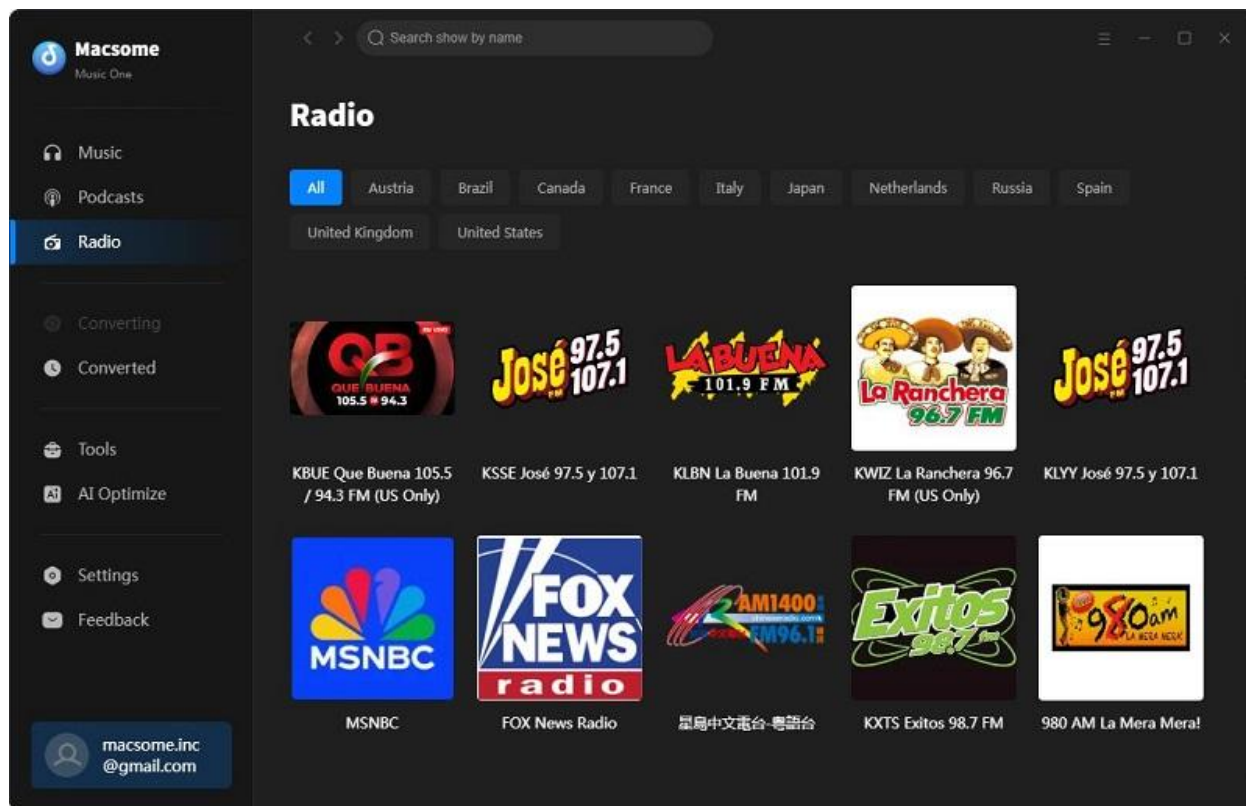

Add Podcasts to Download

Go to **Podcasts** tab, search a Podcasts you want to play, or select one episode you want to download.

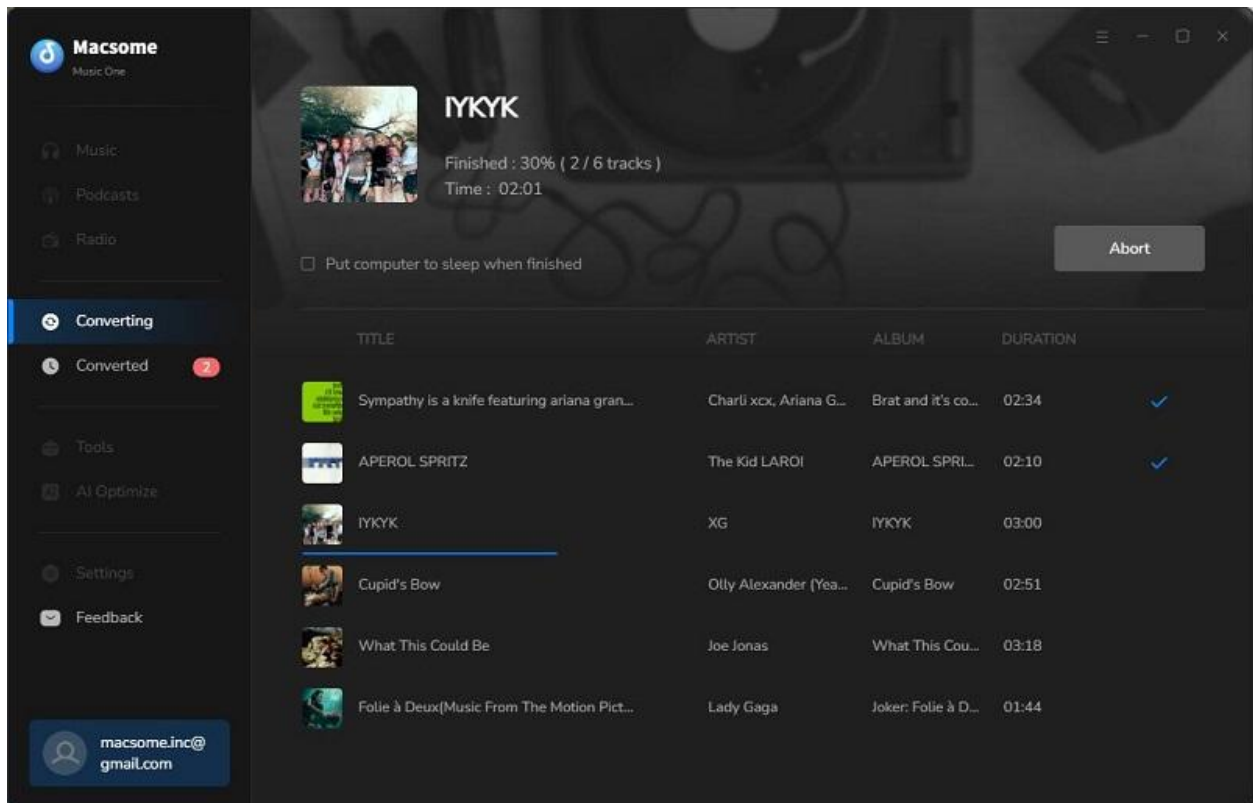

Listen to and Record Radios

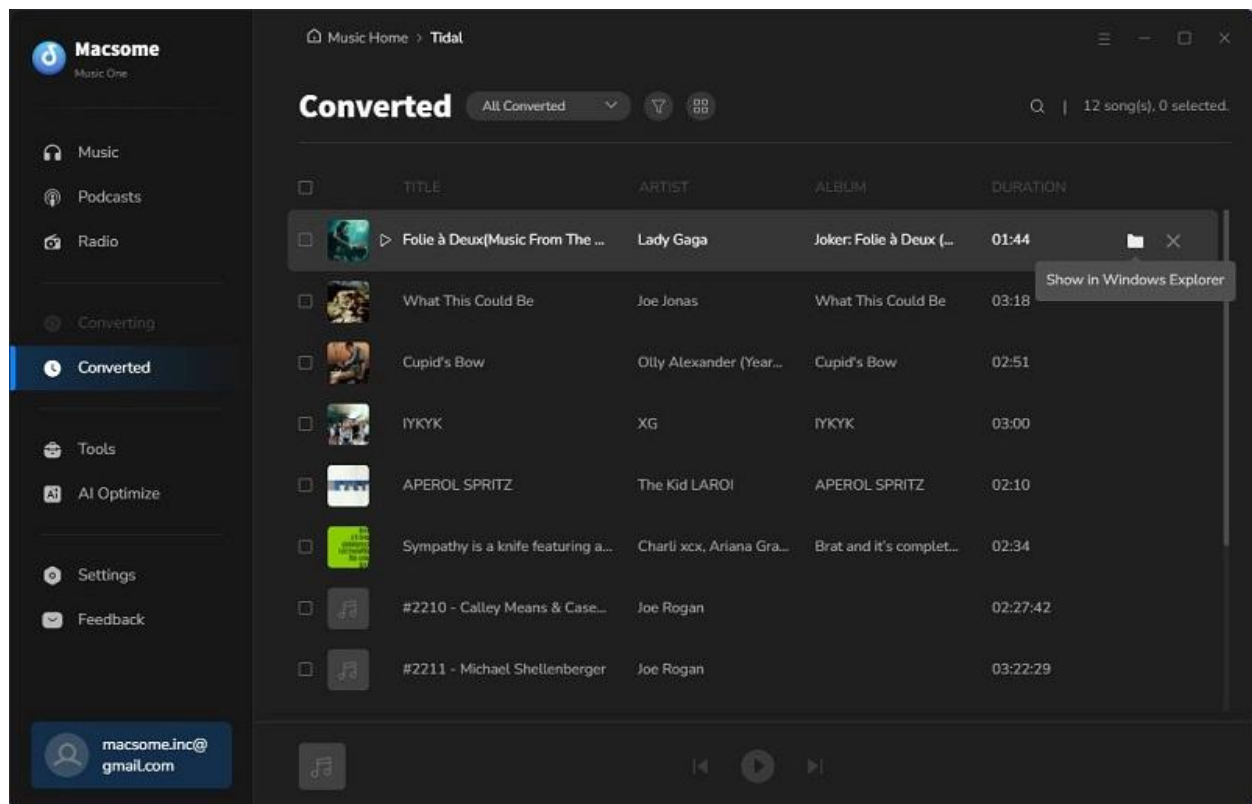

Convert Music Files

After finish customization, just click the **Convert** button to start the converting.

Check Conversion History

Once the conversion is done, you can find the downloaded songs by clicking **“Converted”** or directly going to the output folder you customized in previous step.

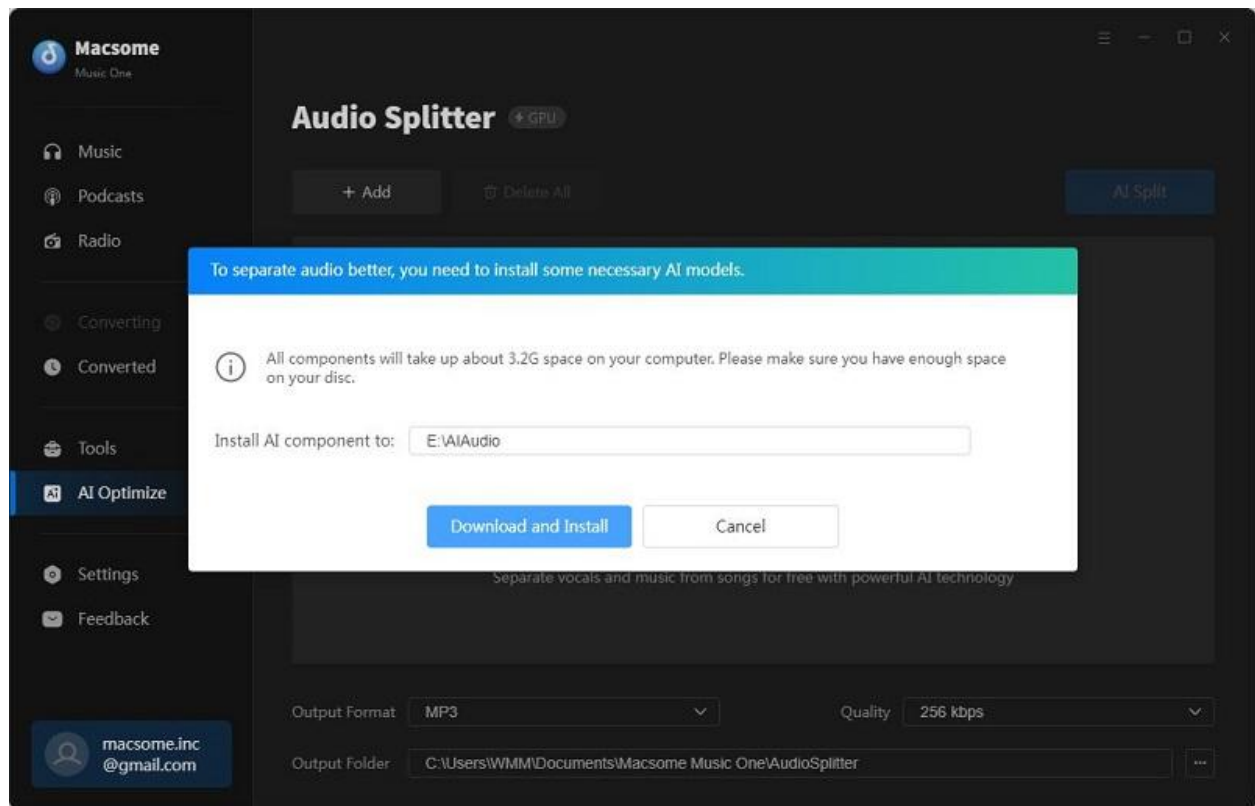

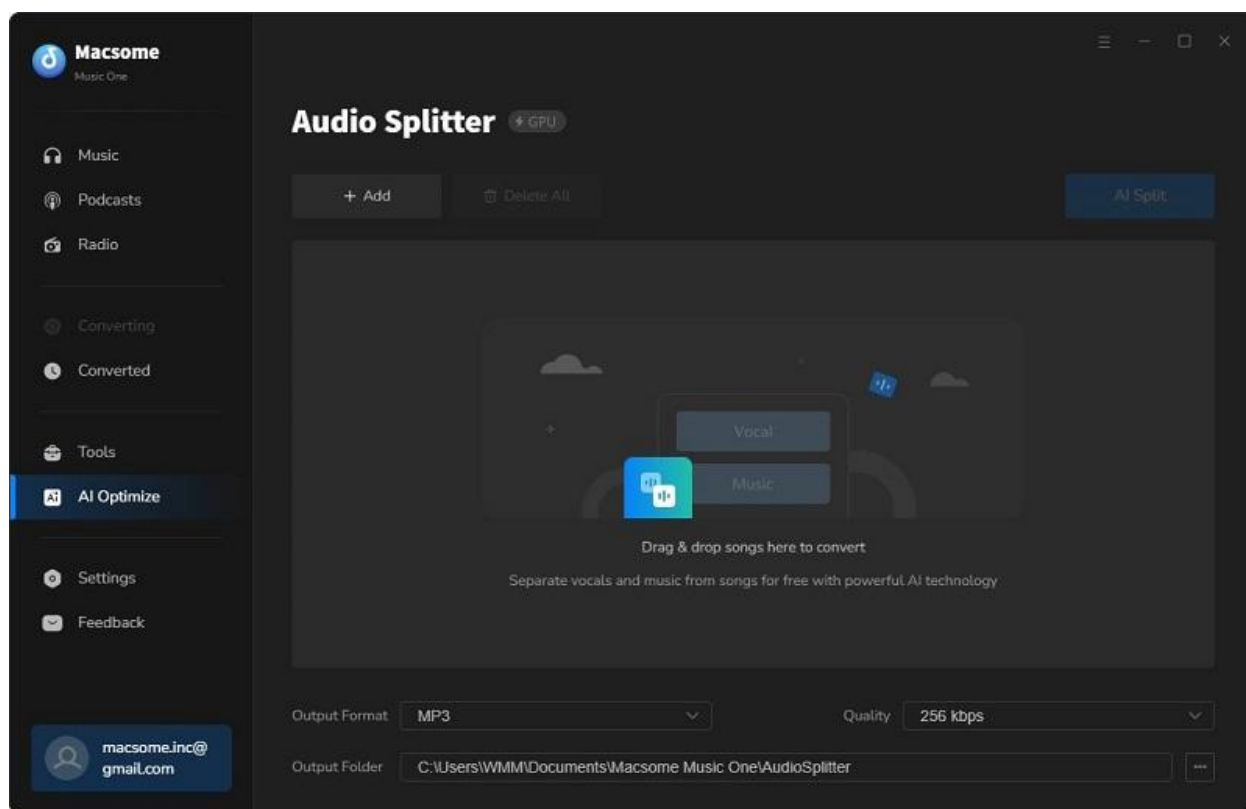

Useful Built-in Tools

Macsome Music One offers tools, including **AI Audio Splitter**, **AA/AAX Converter**, **Format Converter**, **CD Burner**, and **Tag Editor**.

AI Audio Splitter

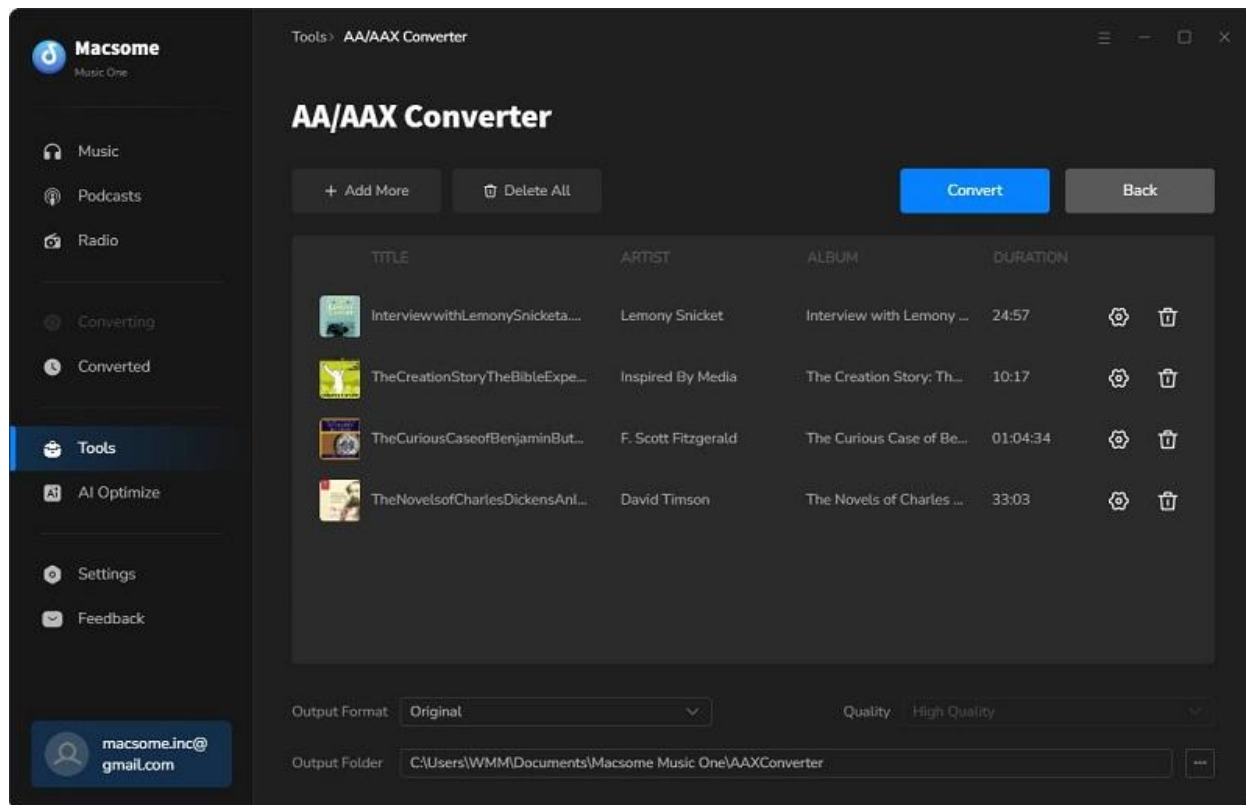

Macsome Music One offers a free AI Audio Splitter. With this free AI Vocal Remover, you can extract, isolate, or remove any instrumental or vocal from any music.

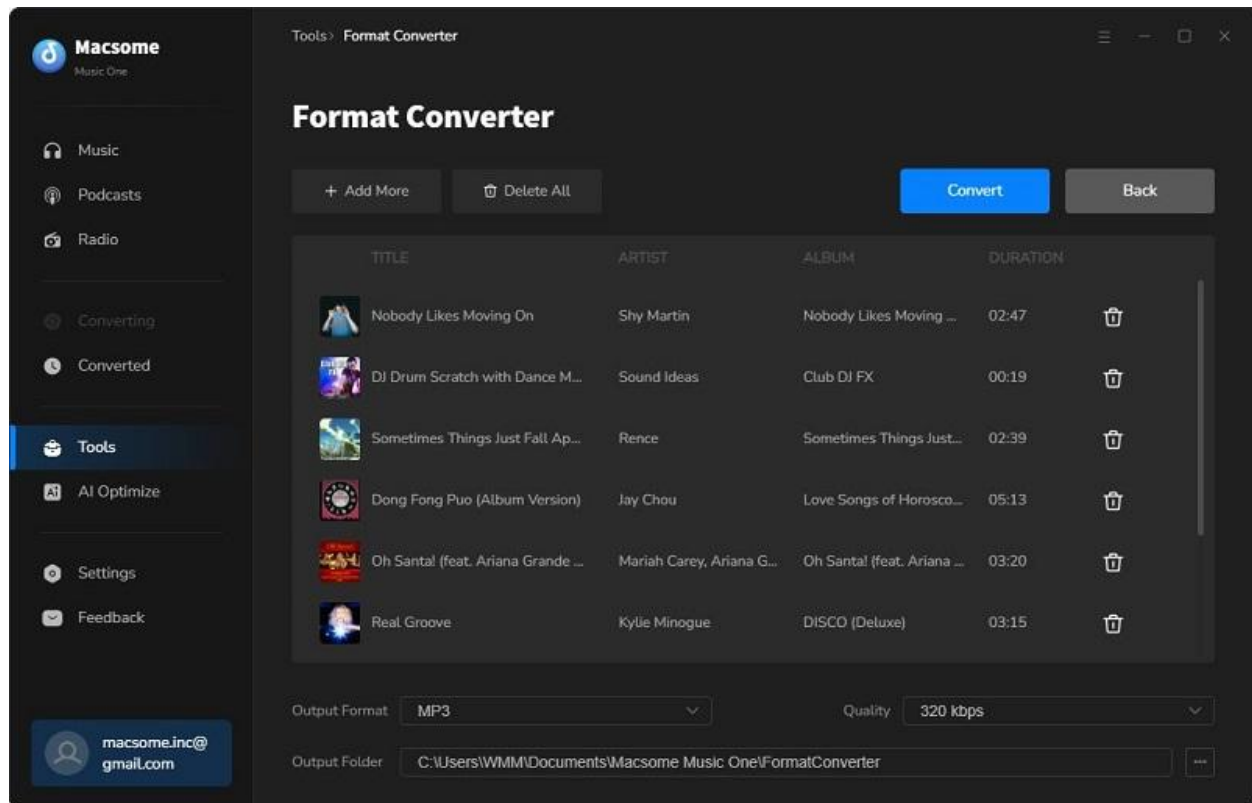

AA/AAX Converter

The **AA/AAX Converter** is used to convert local Audible AA or AAX audiobooks to MP3, M4A, and M4B with original quality. You can also split audiobooks by chapter, minute or hour, or segment.

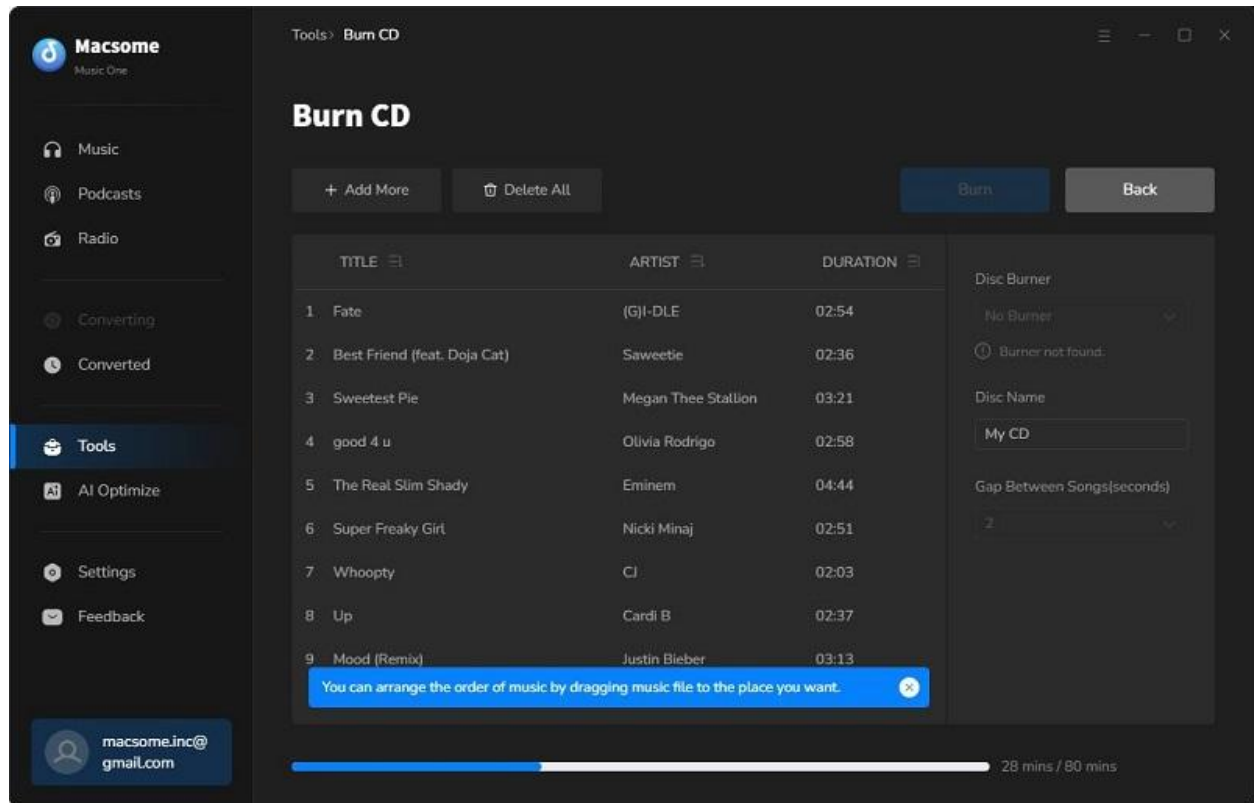

Format Converter

Click the **"Tools"** tab on the left, then select the **"Format Converter"**, click **"+ Add"** button to select the music files from your computer to convert them to MP3, M4A, FLAC, WAV, OGG, and AIFF.

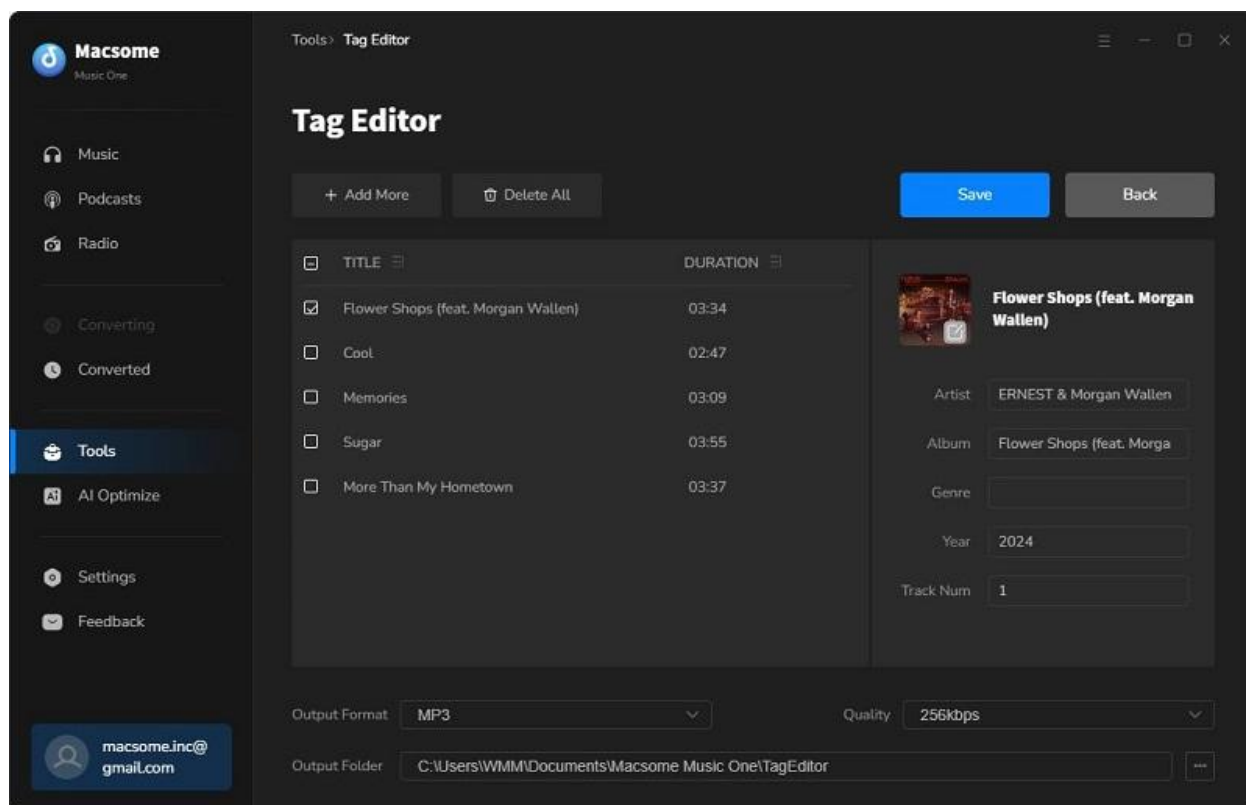

CD Burner

Select the **"Burn CD"** from the **"Tools"** pane, click **"Add More"** button to select the songs from your local computer, insert a blank CD. Hit on the **"Burn"** button to start the burning process. Wait a moment, your songs will be burned to a CD successfully.

Tag Editor

Click on the **"Tools" - "Tag Editor"**, then select the songs from the local folder by clicking the **" + Add "** to edit tags, such as Artwork, Title, Album, etc.
