Installation

To install this product, please follow the steps below:

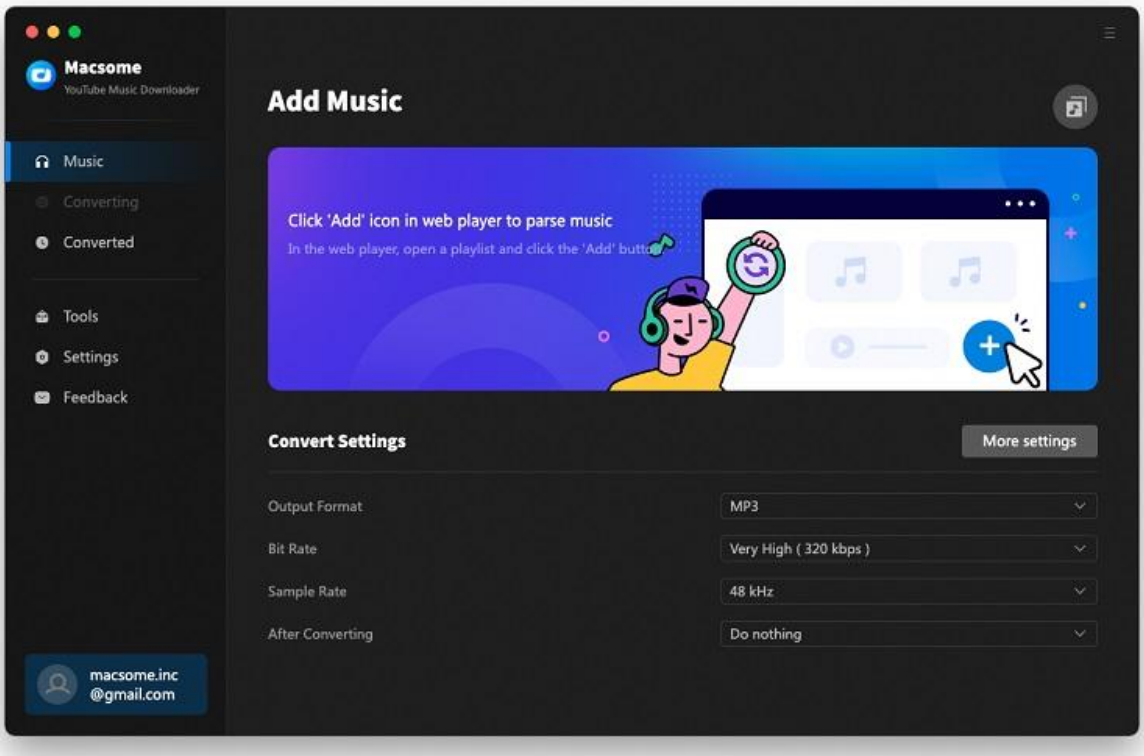
1. Download Macsome YouTube Music Downloader Mac version from Download Page.

2. Double click the installation file **youtube-music-downloader-mac.dmg** to install the program.

3. Follow the instruction to finish the installation.

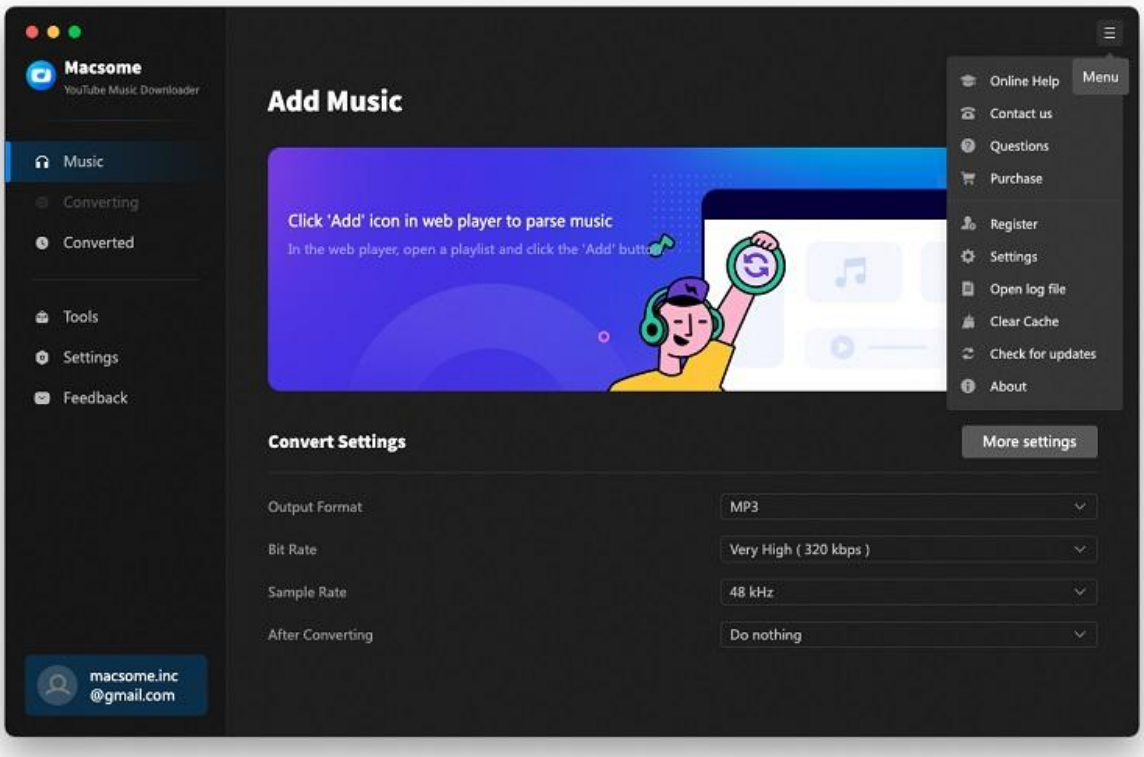
Main Interface

After launching Macsome YouTube Music Downloader on your Mac, you will see the main interface like this:



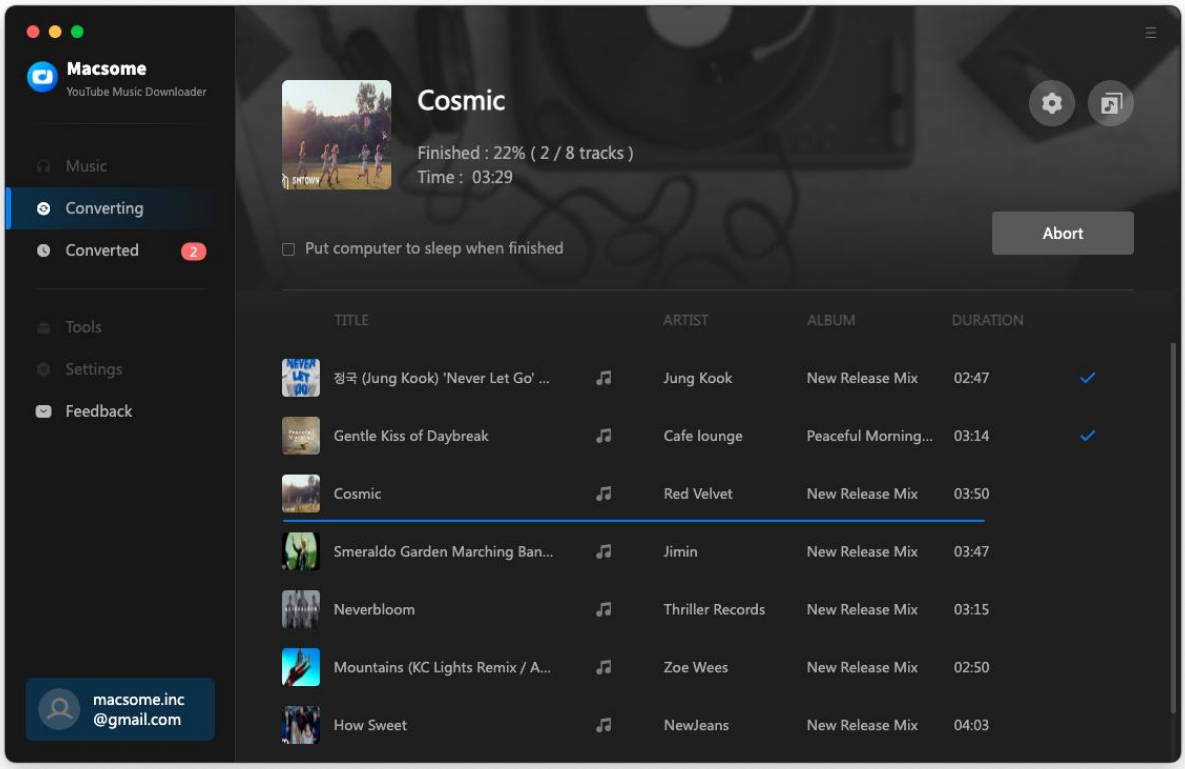
Menu

When clicking the menu button, you will see the menu list like this:



Converting Interface

After clicking the **Convert** button, you will see the converting interface like this:



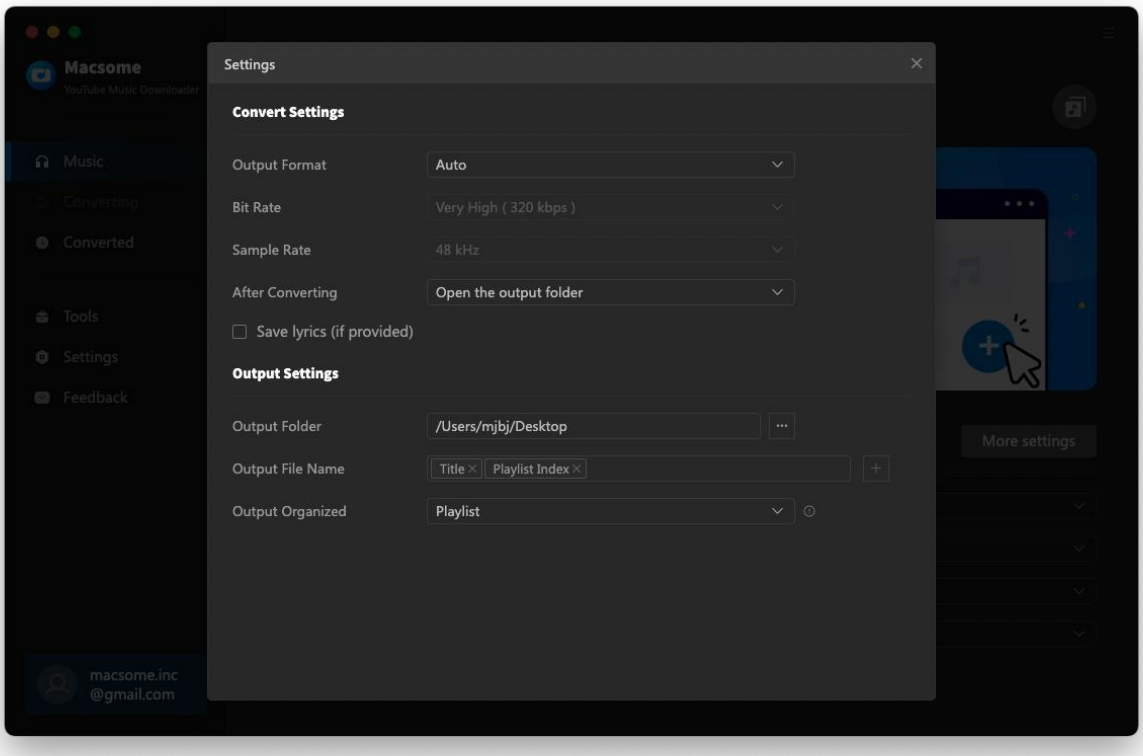
Tutorials

- Customize Output Settings
- Import Music Files
- Convert Music Files
- Check Conversion History

Customize Output Settings

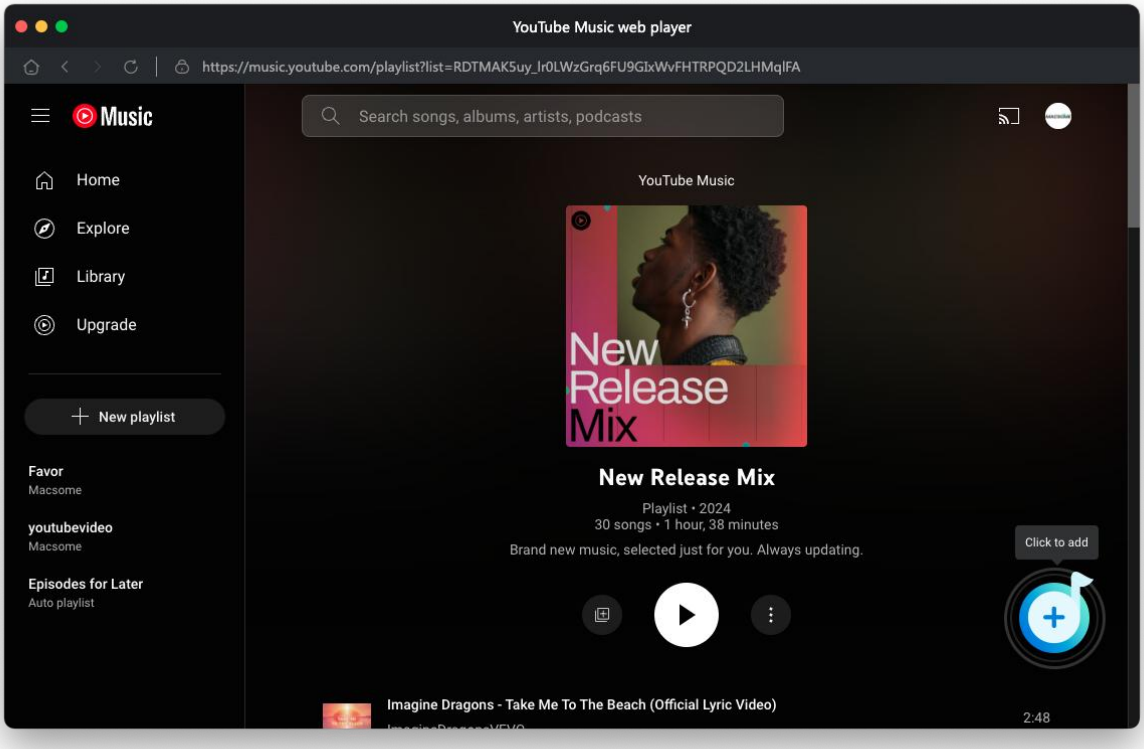
Click the **More** s**ettings** in the main window to choose the Output Format (MP3/AAC/FLAC/WAV/AIFF/ALAC), the Bit Rate (320kbps, 256kbps, 192kbps, 128kbps) and Output Folder.

In addition, for better organizing your music library, you can save the output audio files into an organized folder like Artist, Album, Artist/Album, or Album/Artist.



Import Music Files

Open a playlist, artist or album, then click on the "**Click to add**" button to load the playlist to Macsome.



Tips: Macsome YouTube Music Downloader allows you to download multiple playlists in batch. Just click the **"Add"** button to import another playlist to the program.

Note: When you turn on the **"Also download the music video (If provided)"** tab, this program will download **YouTube Music videos** (if provided) as well. YouTube Music videos will be saved to MP4 format.

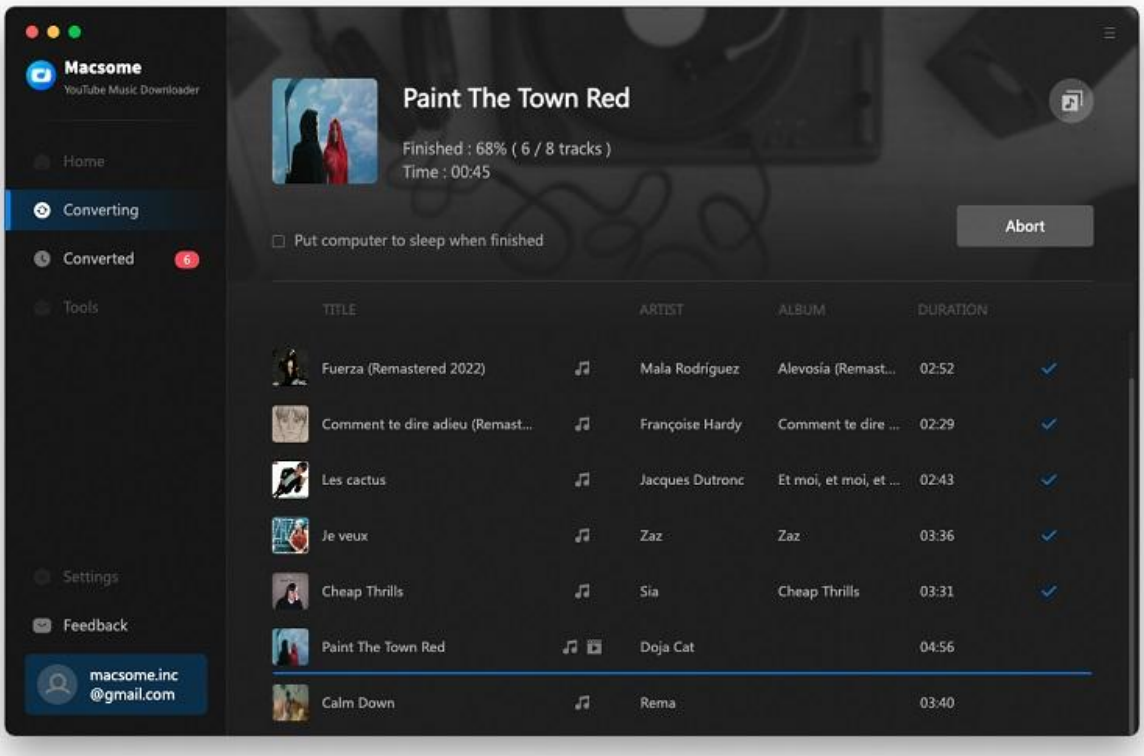
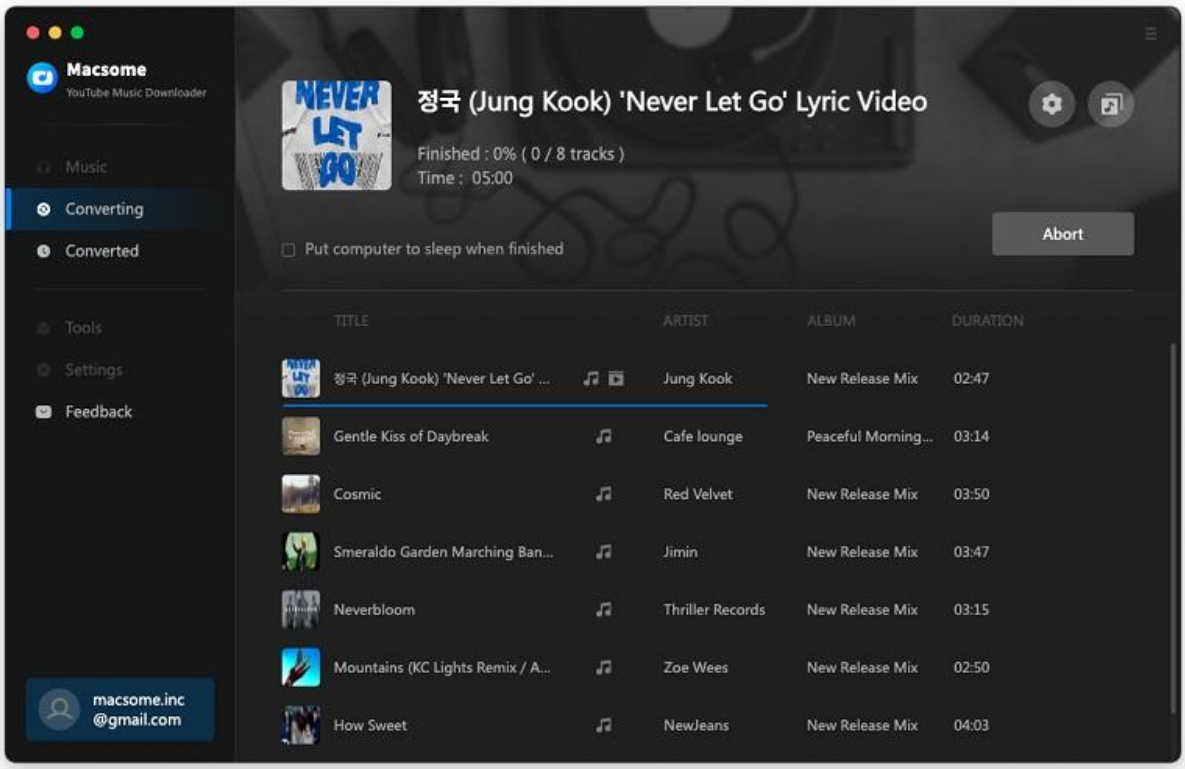
Convert Music Files

After finish customization, just click the **Convert** button to start the converting.



When you see this symbol , it means that you have successfully downloaded the audio as well as the music video for this song.



You can go to your local folder to view and play it. You can also browse and playback converted items directly in the **Converted** tab, but at the moment only audio files are recorded and played back!

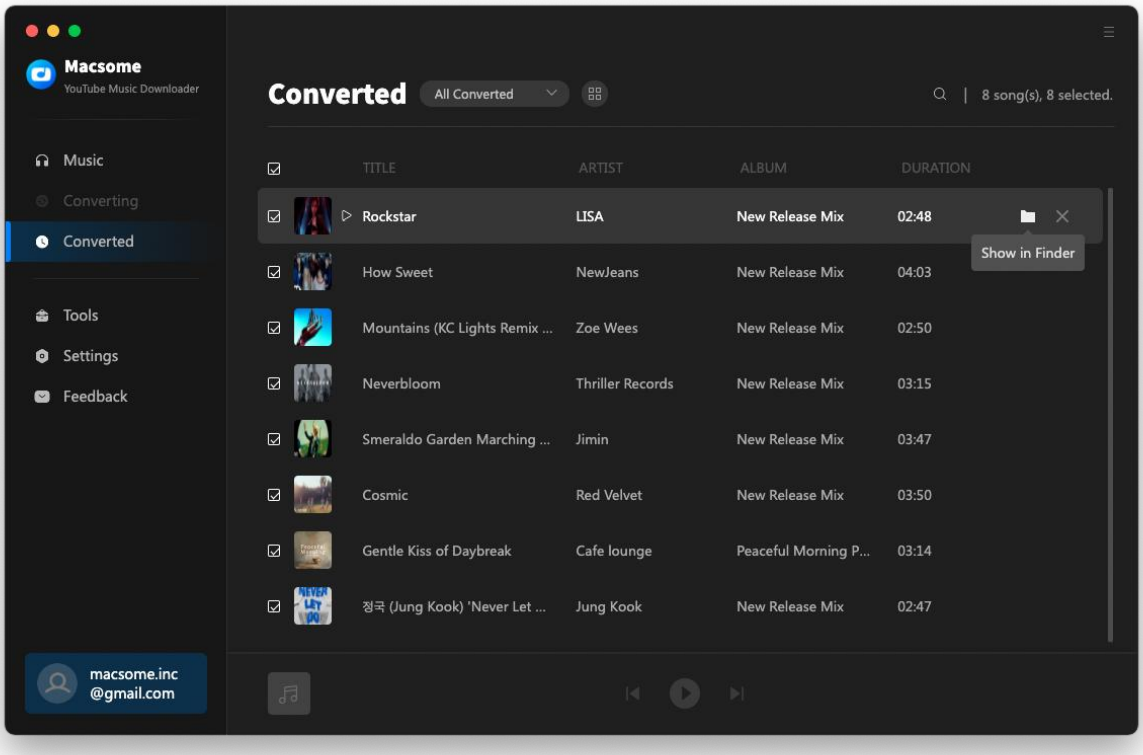
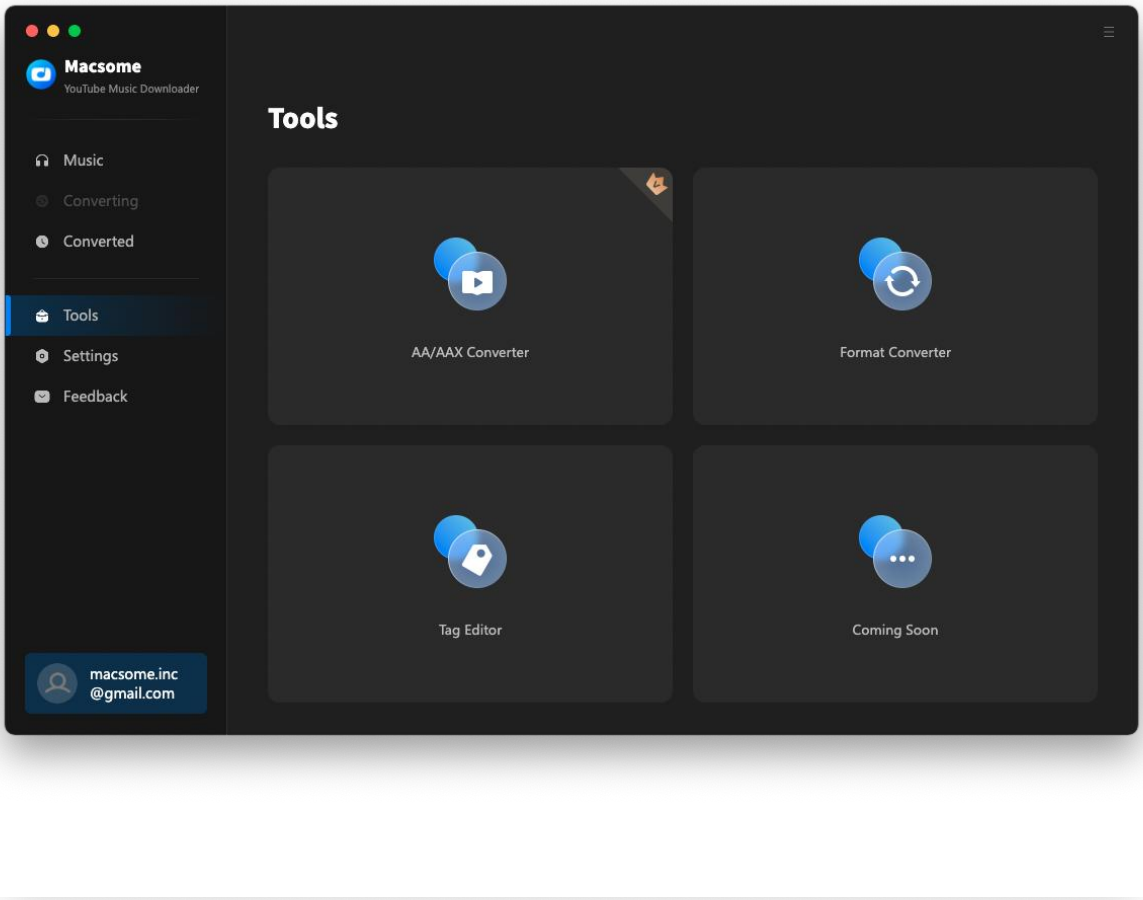
Check Conversion History

Once the conversion is done, you can go to the **Converted** tab to find the downloaded history. You can also directly go to the output folder you customized in previous step.



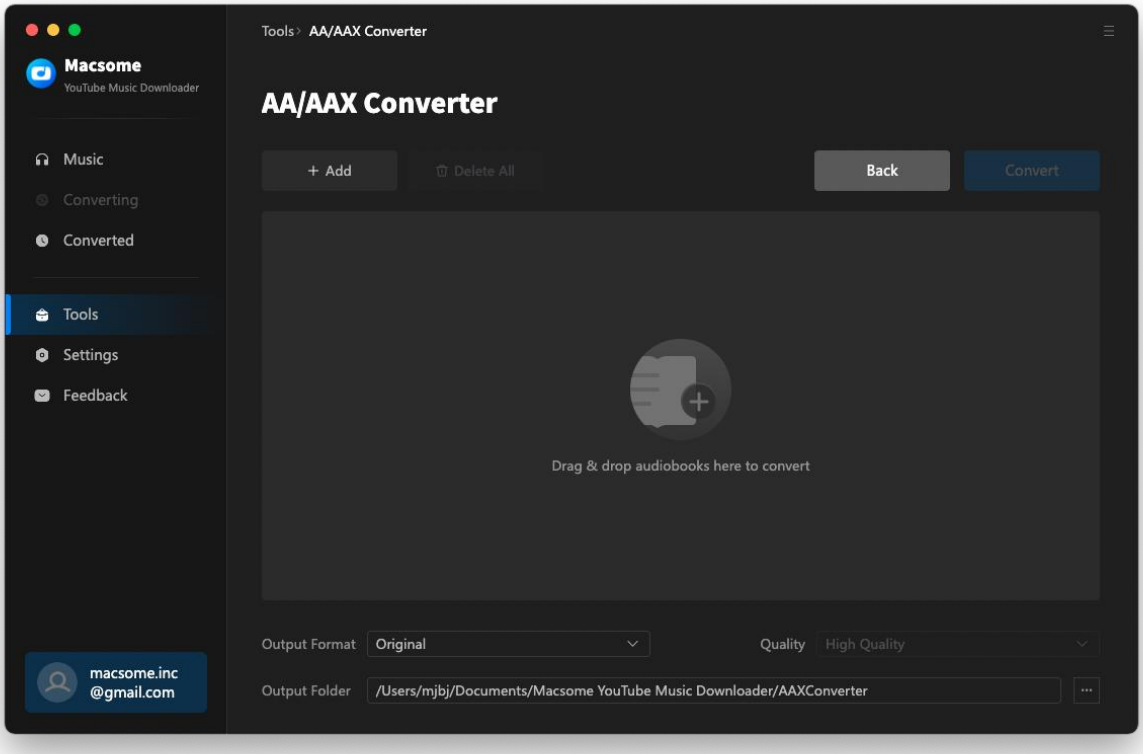
Free Tools

Macsome YouTube Music Downloader provides two useful tools for free. Hit on the **"Tools"** option from the left toolbar, you will find two sections: **"Format Converter"** and **"Tag Edit".**



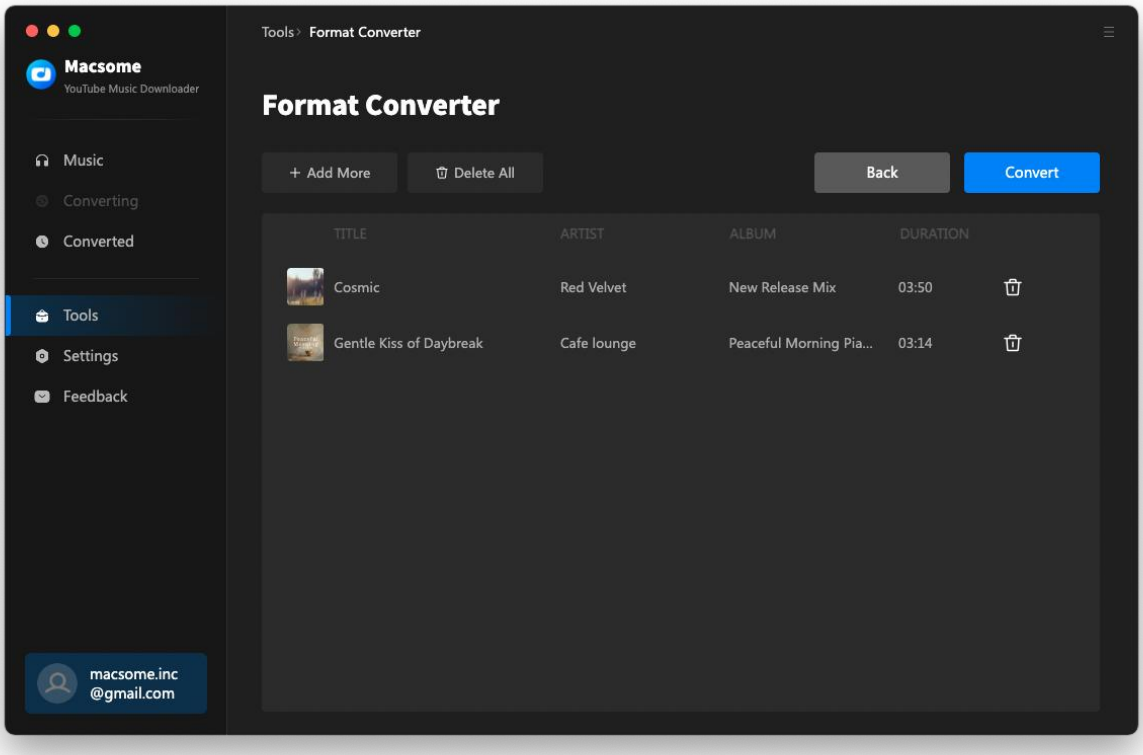
AA/AAX Converter

Suppor downloading Audible audiobooks to MP3, M4A, and M4B without quality loss. This tool is only available for the registed users.



Format Converter

The Format Converter is specially designed for converting local audio files to plain audio formats, including MP3, M4A, FLAC, WAV, OGG, and AIFF. To begin, click the **"+ Add"** button to select local audio files from your computer. You can also set the output format, output quality, and output path. Then, click **"Convert"** to output it in your desired format.



Tag Editor

In the Tag Edit section, users can modify the tag information of songs. Click the **"+ Add"** button to select local audio files from your computer, then simply click **"Save"** to preserve the changes.
